

Call for applications: Capacity building program of Erasmus 2025 PhD exchange program

About the program

The PhD candidates will be conducting their PhD program in two countries, alternating between Germany and Ethiopia every 6 months. This will enable them to gain experience with different working methods and technologies in Germany and transfer their knowledge to Ethiopia. The aim is to adapt newer technologies to Ethiopian social, economic, and ecological conditions, leading to improvements in the faculty and university facility.

Thematic areas

This round of the PhD exchange program, research projects that aligns with one of the following thematic areas will be prioritized:

1. Digital transformation of engineering Education use case automation technology in Ethiopian context

Objective:

- implementing smart digital automation in higher education to enhance students' practical skills and strengthen the connection between institutions and industries
- enhancing the quality and relevance of engineering education, contributing to sustainable development in Ethiopia

2. Circular economy-oriented engineering

Objective

- adapting circular economy principles in engineering, particularly in the design, production, and end-of-life management of products such as photovoltaic (PV) components /electronics in Ethiopian context.

3. PV technology contribution to economic independence for sustainable energy production:

Objective:

- assessing Ethiopia's capacity for research, development, and production of PV technology in comparison to the global market,
- providing a strategic framework for local production of PV technology components versus importation (make-or-buy decisions).

Eligibility requirements

- MSc degree in Engineering (with an average grade of 3.5 or better)
- Enrolled in a PhD program at AAiT
- Strong ICT background/knowledge
- Good written and oral communication skill in English
- Applicants must not be older than 35 years at the time of application
- Priority will be given to applicants who are married and have strong family attachment and females

Application process

Interested candidates should submit the following materials to their school

- Full CV including relevant professional and scholarly achievements, and civic engagements
- PhD Research proposal
- Letter of recommendation from PhD advisor
- A copy of the PhD proposal
- Proof of family status

Important date:

Application deadline: January 5, 2025

Program start date: April 01, 2025

Salary and conditions

- Duration: 3 years, 6-months research stay yearly in Germany.
- Binational advisors, from Ethiopia and German
- Salary: 1100, - Euro/month and 820 Euro for flight ticket
