

✓ 2. Which type of polymorphism is nothing but the method overloading in java? 1/1

- ☒ A. Compile time polymorphism
- ☐ B. Runtime polymorphism
- ☐ C. Dynamic polymorphism
- ☐ D. Both B & C

✗ 3. Which pillars of OOP is nothing but hiding the internal detail of the methods? 0/1

- ☒ A. Encapsulation
- ☐ B. Abstraction
- ☐ C. Inheritance
- ☐ D. Polymorphism

ትክክለኛ መልስ

- ☒ B. Abstraction

✓ 4. Which type of inheritance does not supported by Java? 1/1

- ☐ A. Single inheritance
- ☒ B. Multiple inheritances
- ☐ C. Hierarchical inheritance
- ☐ D. Hybrid Inheritance

✓ 5. Which pillars of OOP is nothing but one task performs in different way? 1/1

- ☒ A. Polymorphism
- ☐ B. Inheritance
- ☐ C. Abstraction
- ☐ D. Encapsulation

Event driven programming in Visual Basic (6 -10)

4 ከ5 ነጥቦች

✓ 6. When the user clicks a button, _____ is triggered 1/1

- ☒ A. an event
- ☐ B. a method
- ☐ C. a setting
- ☐ D. a property

✗ 7. What is the correct statement when declaring and assigning the value of 100 to an Integer variable called numPeople 0/1

- ☐ A. Dim numPeople =
- ☒ B. Dim numPeople = Int(100)
- ☐ C. numPeople = 100
- ☐ D. Dim numPeople As Integer = 100

✗

ትክክለኛ መልስ

- ☒ D. Dim numPeople As Integer = 100

✓ 8. What value will be assigned to the numeric variable x when the following statement is executed? $x = 2 + 3 * 4$ 1/1

- ☐ A. 20
- ☒ B. 14
- ☐ C. 92
- ☐ D. 234

✓

✓ 9. What is the proper syntax when using a message dialog box? 1/1

- ☒ A. MessageBox.Show("Hi there", "Hi")
- ☐ B. MessageBox.Show(Hi there, Hi)
- ☐ C. MessageBox.Show "Hi There", "Hi"
- ☐ D. MessageBox.Show Hi There, Hi

✓

✓ 10. Which of the following is a valid Visual Basic conditional statement? 1/1

- ☐ A. $2 < n < 5$
- ☐ B. $2 < n \text{ Or } < 5$
- ☐ C. $2 < n \text{ Or } 5$
- ☒ D. $(2 < n) \text{ Or } (n < 5)$

Database Systems (11 - 23)

9 ከ13 ንጥቦች

✗ 11. The three-schema architecture can make it easier to achieve true data independence, both physical and logical. What is the role of data independence in a database management system (DBMS)? 0/1

- ☐ A. Ensure data is stored securely and cannot be accessed by unauthorized users.
- ☐ B. Allow applications to access and manipulate data without being concerned about the underlying physical storage details.
- ☒ C. Provide a consistent and standardized way of querying and retrieving data from the database. ✗
- ☐ D. Enforce data integrity constraints and ensure the accuracy and reliability of the data.

ትክክለኛ መልስ

- ☒ B. Allow applications to access and manipulate data without being concerned about the underlying physical storage details.

✓ 12. What is the purpose of the high-level conceptual model in Entity-Relationship (ER) modeling? 1/1

- ☐ A. Define the physical storage structure of the database.
- ☐ B. Provide a visual representation of the database schema.
- ☒ C. Describe the logical structure and relationships among entities in the database. ✓
- ☐ D. Specify the operations that can be performed on the database.

✗ 13. What are the constraints and characteristics associated with specialization and generalization? 0/1

- ☐ A. Constraints ensure that each entity belongs to only one subclass, and characteristics define the additional attributes of each subclass.
- ☐ B. Constraints ensure that each entity belongs to at least one subclass, and characteristics define the common attributes of the super-class.
- ☐ C. Constraints ensure that each entity belongs to only one super-class, and characteristics define the additional attributes of each super-class.
- ☒ D. Constraints ensure that each entity belongs to at least one super-class, and characteristics define the common attributes of the subclasses. ✗

ትክክለኛ መልስ

- ☒ B. Constraints ensure that each entity belongs to at least one subclass, and characteristics define the common attributes of the super-class.

✗ 14. Constraints ensure that each entity belongs to at least one super-class, and characteristics define the common attributes of the subclasses. 0/1

- ☐ A. Functional dependency is a technique used in normalization to identify redundant data.
- ☐ B. Normalization is a process that ensures functional dependencies are satisfied in a database.
- ☒ C. Functional dependency is a data constraint that is applied after the normalization process. ✗
- ☐ D. Normalization and functional dependency are unrelated concepts in database design.

ተከክለኛ መልስ

- ☒ B. Normalization is a process that ensures functional dependencies are satisfied in a database.

✓ 15. Schema design is to minimize the storage space used by the base relations. How does information redundancy lead to update anomalies in a database? 1/1

- ☐ A. Redundancy allows for more efficient data retrieval and updates.
- ☐ B. Redundancy improves the performance of database queries.
- ☒ C. Redundancy leads to inconsistencies and data anomalies when updating data. ✓
- ☐ D. Redundancy ensures data consistency and integrity in the database

✓ 16. How does the relational algebra help in manipulating data in a relational database? 1/1

- ☒ A. Providing a formal set of operations for querying and manipulating data. ✓
- ☐ B. Defining the physical storage structure of the database.
- ☐ C. Enforcing security measures and access controls on the database.
- ☐ D. Representing data as a collection of objects with attributes and behaviors.

✓ 17. What is the primary purpose of record storage and primary file organization in a database? 1/1

- ☐ A. Ensure data consistency and integrity.
- ☒ B. Provide a logical structure for organizing and accessing records ✓
- ☐ C. Enforce referential integrity constraints.
- ☐ D. Define the relationships between tables in a database.

✗ 18. How can SQL queries be translated into relational algebra? 0/1

- ☐ A. Using heuristics to optimize query execution.
- ☒ B. Applying selectivity and cost estimates to optimize query execution. ✗
- ☐ C. Using basic algorithms for executing query operations.
- ☐ D. Transforming SQL statements into a formal algebraic representation

ተከክለኛ መልስ

- ☒ D. Transforming SQL statements into a formal algebraic representation

✓ 19. What is serializability of schedules in transaction processing? 1/1

- ☐ A. The ability to execute transactions in parallel without any conflicts.
- ☐ B. The ability to recover the database to a consistent state after failures.
- ☒ C. The ability to execute transactions in a specific order that preserves consistency. ✓
- ☐ D. The ability to enforce referential integrity constraints between tables.

✓ 20. Transaction provides a mechanism for describing logical units of database processing. What is validation (optimistic) concurrency control technique? 1/1

- ☒ A. Allows transactions to execute without acquiring locks and validates them for conflicts before committing ✓
- ☐ B. Assigns locks to data items to control access by multiple transactions.
- ☐ C. Enforces referential integrity constraints.
- ☐ D. Optimizes query execution and indexing.

✓ 21. Concurrency control and recovery mechanisms are mainly concerned with the database commands in a transaction. How is recovery handled in multi-database systems? 1/1

- ☒ A. Using distributed recovery protocols that coordinate recovery across multiple databases. ✓
- ☐ B. Enforcing referential integrity constraints.
- ☐ C. Optimizing query execution and indexing.
- ☐ D. Implementing shadow paging for each individual database.

✓ 22. What are the relational operations used in the relational algebra? 1/1

- ☒ A. SELECT, PROJECT, JOIN, and UNION. ✓
- ☐ B. INSERT, UPDATE, DELETE, and ALTER.
- ☐ C. CREATE, DROP, TRUNCATE, and GRANT.
- ☐ D. COMMIT, ROLLBACK, SAVEPOINT, and LOCK.

✓ 23. Which SQL clause is used to specify conditions for filtering rows in a SELECT statement? 1/1

- ☐ A. FROM
- ☒ B. WHERE ✓
- ☐ C. HAVING
- ☐ D. ORDER BY

System Analysis and Design (24 - 28)

3 ከ5 ነጥቦች

✓ 24. The process of ensuring that the information system is operational and allowing users to take over its operation is refer to: 1/1

- ☒ A. system Implementation
- ☐ B. System production
- ☐ C. system Planning
- ☐ D. user Training

✓ 25. The main aim of producing process specifications is in order to: 1/1

- ☐ A. Reduce process interactions.
- ☒ B. Validate the system design, including data flow diagrams and the data dictionary.
- ☐ C. Build technical specifications for a specific computer language.
- ☐ D. Design computer input and output processes

✗ 26. Which of the following SDLC model is a risk driven process model? 0/1

- ☐ A. RAD model
- ☒ B. Incremental Model
- ☐ C. V-shape Model
- ☐ D. Spiral Model

✗

ትክክለኛ መልስ

- ☒ D. Spiral Model

✗ 27. In a phase of micro life cycle information system life cycle the phase which consist of study cost benefit and potential area of application is a kind of: 0/1

- ☒ A. Deployment Analysis phase
- ☐ B. Validation Analysis phase
- ☐ C. Feasibility Analysis phase
- ☐ D. Implementation Analysis phase

✗

ትክክለኛ መልስ

- ☒ C. Feasibility Analysis phase

✓ 28. Which of the following statements is false with respect to a Data Dictionary? 1/1

- ☐ A. It is a repository of the elements in a system.
- ☒ B. data dictionary and data store both are same ✓
- ☐ C. It manages detail
- ☐ D. It communicates the common meanings for system elements and activities

Information Assurance and Security (29 - 33)

2 ከ5 ነጥቦች

✗ 29. Using symmetric key encryption to successfully provide authentication relies upon: 0/1

- ☒ A. The sender encrypting with a private key ✗
- ☐ B. The sender encrypting with a public key
- ☐ C. The sender sending an encrypted copy of the shared secret key
- ☐ D. The recipient being able to identify messages encrypted with the wrong key

ትክክለኛ መልስ

- ☒ D. The recipient being able to identify messages encrypted with the wrong key

✓ 30. Which is the largest disadvantage of the symmetric Encryption? 1/1

- ☐ A. More complex and therefore more time-consuming calculations.
- ☒ B. Problem of the secure transmission of the Secret Key. ✓
- ☐ C. Less secure encryption function.
- ☐ D. Isn't used any more.

✗ 31. What is the best statement for taking advantage of a weakness in the security of an IT system? 0/1

- ☐ A. Threat
- ☒ B. Attack ✗
- ☐ C. Exploit
- ☐ D. Vulnerability

ትክክለኛ መልስ

- ☒ C. Exploit

✓ 32. A security manager is setting up resource permission in application .The security manager has discovered that he can establish object that contains accesses control model that most closely resembles is: 1/1

- ☐ A. Access matrix
- ☐ B. Mandatory access control (MAC)
- ☐ C. Discretionary access control (DAC)
- ☒ D. Role based access control (RBAC)

✗ 33. A security officer has declared that information system must be certified 0/1 before it can be used. This is belongs for:

- ☐ A. The system must be evaluated according to established evaluation criteria
- ☐ B. A formal management decision is required before the system can be used
- ☒ C. Penetration tests must be performed against the system
- ☐ D. A code review must be performed against the system

ትክክለኛ መልስ

- ☒ A. The system must be evaluated according to established evaluation criteria

System and Network Administration (34 - 41)

7 ከ8 ነጥቦች

✓ 34. What is a roaming profile, exactly?

1/1

- ☐ A. A user profile that stored on a local computer and can be accessed from that computer
- ☐ B. A user profile that stored on a local computer and can be accessed from any computer
- ☒ C. A user profile that stored on a remote server and can be accessed from any computer in the network ✓
- ☐ D. user profile that stored on a remote server and can be accessed from that server

✓ 35. What is the difference between a computer system and a network?

1/1

- ☐ A. A computer system is a group of computers that are connected to each other, while a network is a single computer
- ☒ B. A computer system is a single computer, while a network is a group computers that connected to each other. ✓
- ☐ C. A computer system is a group of hardware components, while a network is a software application.
- ☐ D. A computer system is a software application, , while a network is a group of hardware.

✓ 36. Abebe is the XY campaign system administration. What is his main responsibility in the campaign? 1/1

- ☐ A. To develop new software application
- ☐ B. To provide technical support for every user
- ☐ C. To design computer system and network
- ☒ D. To manage and maintain computer systems and networks. ✓

✓ 37. What is system administration's guiding philosophy? 1/1

- ☐ A. Increasing system and network complexity
- ☐ B. Boosting system and network performance
- ☒ C. Increasing system and network security ✓
- ☐ D. Improving system and network usability

✓ 38. TCP/IP is _____ 1/1

- ☐ A. A software application used to manage user accounts and permissions
- ☐ B. A computer hardware component used to store data
- ☒ C. A networking protocol used to transfer data over internet ✓
- ☐ D. A network security protocol used to encrypt data transfers

✓ 39. When we define the work-group in a Windows network, it is _____ 1/1

- ☒ A. A group of computers that share the same network resources ✓
- ☐ B. A group of computers that share the same software application
- ☐ C. A group of computers that share the same hardware resources
- ☐ D. None of the above

✓ 40. What are network ideas and Linux systems? 1/1

- ☐ A. The fundamentals of setting up and maintaining virtual computers
- ☒ B. The essential ideas behind network design and Linux operating systems ✓
- ☐ C. The fundamentals of database administration and management
- ☐ D. The fundamentals of server management and web development

✗ 41. What is a domain controller in a Windows network? 0/1

- ☐ A. Computer that manages user accounts and permissions
- ☐ B. A computer that manages hardware and resources and configurations
- ☐ C. A computer that manages software and applications and updates
- ☒ D. A computer that manages network security and access ✗

ተከክለኛ መልስ

- ☒ A. Computer that manages user accounts and permissions

✓ 42. HTML is a language used to develop a web page. It has also different components to be used for performing different tasks. Then HTML tags are used to describe document 1/1

- ☐ A. Definition
- ☒ B. Content
- ☐ C. Language
- ☐ D. Model

✓ 43. Markup language is a text-encoding system consisting of a set of symbols inserted in a text document to control its structure, formatting, or the relationship between its parts. The program written by HTML is then read and rendered by 1/1

- ☐ A. Compiler
- ☐ B. Server
- ☒ C. Web browser
- ☐ D. Interpreter

✓ 44. HTML program is on the first step needed to develop hypertext document which is going to be accessed on the World Wide Web. Different HTML pages are linked together to form a website. The Page designed in HTML is then called as 1/1

- ☐ A. Server page
- ☐ B. Media page
- ☐ C. Physical page
- ☒ D. Web page

✗ 45. Fundamental blocks in HTML is called as _____ 0/1

- ☐ A. HTML attribute
- ☐ B. HTML tag
- ☒ C. HTML body
- ☐ D. HTML element

ትክክለኛ መልስ

- ☒ B. HTML tag

✗ 46. The two most common methods for designing websites that work well both on desktop and mobile are responsive and adaptive design. Then which one of the following is correct? 0/1

- ☒ A. In adaptive design, content moves dynamically depending on screen size ✗
- ☐ B. in responsive design, the website content is fixed in layout sizes that match common screen sizes
- ☐ C. Preserving a layout that is as consistent as possible between devices is crucial to
- ☐ maintaining user trust and engagement
- ☐ D. All

ትክክለኛ መልስ

- ☒ C. Preserving a layout that is as consistent as possible between devices is crucial to

✗ 47. Assume that you are trying to add two numbers by using a JavaScript. 0/1
If one of the number you are using is NAN then the output will be

- ☐ A. Infinite
- ☐ B. NAN
- ☐ C. Zero
- ☒ D. Null ✗

ትክክለኛ መልስ

- ☒ B. NAN

✓ 48. You need to apply a cascading stylesheet in your HTML document by adding a space inside the text field or text area you are going to use. Then from the following, which one you are going to use? 1/1

- ☒ A. Padding
- ☐ B. Margin
- ☐ C. Number
- ☐ D. Password

✗ 49. The data sent by POST method goes through HTTP header so security depends on HTTP protocol. By using Secure HTTP you can make sure that your information is secure. What is \$_POST? 0/1

- ☐ A. An associative array
- ☐ B. A PHP variable
- ☐ C. A data structure containing all the form variables
- ☒ D. All of the above

ትክክለኛ መልስ

- ☒ C. A data structure containing all the form variables

✓ 50. Which of the following is the correct use of the strcmp() function in PHP? 1/1

- ☐ A. The strcmp() function is used to compare the strings excluding case
- ☐ B. The strcmp() function is used to compare the uppercase strings
- ☐ C. The strcmp() function is used to compare the lowercase strings
- ☒ D. The strcmp() function is used to compare the strings including case

✗ 51. Consider the following JavaScript code and choice correct output 0/1

```
<script type="text/javascript" language="javascript">
|
var a = " Smarts ";
var result = a.substring(2, 4);
document.write(result);

</script>
```

- ☐ A. ar
- ☒ B. art
- ☐ C. mar
- ☐ D. marts

ትክክለኛ መልስ

- ☒ A. ar

✓ 52. If a computer beeps once then three times, then four times, then three more times during POST and the computer has a Phoenix BIOS, what is a possible suspect component? 1/1

- ☐ A. Keyboard
- ☒ B. BIOS
- ☐ C. Memory (RAM)
- ☐ D. Video

✗ 53. Which one of the following could not be power supply problem? 0/1

- ☐ A. The monitor has power light, but nothing appears on the monitor and no PC power light illuminates.
- ☐ B. When the computer powers on, it does not beep at all.
- ☒ C. The computer reboots without warning.
- ☐ D. The computer sounds a continuous beep.
- ☐ E. When the computer powers on, it beeps only once.
- ☐ F. The power supply fan does not turn when the computer is powered on.

ተከክለኛ መልስ

- ☒ B. When the computer powers on, it does not beep at all.

✗ 54. Which one of the following is the correct order of speed of accessing a data from a memory, fastest to slowest? 0/1

- ☒ A. Cache memory --> DRAM --> Virtual memory --> Hard disk drive
- ☐ B. Cache memory --> Hard disk drive--> Virtual memory --> DRAM
- ☐ C. DRAM-->Cache memory --> Virtual memory --> Hard disk drive
- ☐ D. DRAM --> Virtual memory --> Hard disk drive --> Cache memory

✗

ትክክለኛ መልስ

- ☒ C. DRAM-->Cache memory --> Virtual memory --> Hard disk drive

✓ 55. Which one of the following is a bad habit when performing computer hardware maintenance? 1/1

- ☐ A. Using Antistatic devices (antistatic mat and antistatic wrist strap).
- ☒ B. Using magnetized screw drivers while disassembling a HDD.
- ☐ C. Keeping paper and pen nearby for note taking and diagramming.
- ☐ D. When removing adapters, not stacking the adapters on top of one another.

✓

✓ 56. _____ Windows option used when the computer stalls, slows down, does not work properly, has improper video settings or intermittent errors, or when a new hardware/software installation causes problems. 1/1

- ☐ A. Safe mode
- ☐ B. Formatting disk
- ☐ C. Disk defragmentation
- ☒ D. Configuring bios setting

✗ 57. Subsystem of printer that pulls, pushes, or rolls paper through the printer. 0/1

- ☐ A. Paper transport
- ☒ B. Print engine
- ☐ C. Marking
- ☐ D. Print head

ትክክለኛ መልስ

- ☒ D. Print head

✗ 58. One of the following is wrong about performing computer components cleaning (preventive maintenance) 0/1

- ☐ A. Using denatured alcohol for cleaning rubber rollers, such as those found inside printers
- ☒ B. Spraying or pour liquid on computer components. ✗
- ☐ C. Using Urethane swabs to clean between the keys on a keyboard.
- ☐ D. Power off and unplug the computer power before performing preventive maintenance.

ትክክለኛ መልስ

- ☒ A. Using denatured alcohol for cleaning rubber rollers, such as those found inside printers

✗ 59. If after you have configured the drive, installed it, and powered it on, the BIOS shows the drive type as "None, Not installed," or displays all 0s in the drive parameters even though you set it to automatically detect the drive, what will be the possible problem? 0/1

- ☐ A. The BIOS is not detecting the drive.
- ☐ B. The problem on the jumper settings.
- ☐ C. The two PATA drives connected to the same cable.
- ☐ D. Wrong installation (cabling and connection)
- ☒ E. All of the above ✗
- ☐ F. None of the above

ትክክለኛ መልስ

- ☒ B. The problem on the jumper settings.

✗ 60. Which component of a computer is known as the firmware?

0/1

- ☐ A. Operating system
- ☒ B. Installation drivers
- ☐ C. Random access memory (RAM)
- ☐ D. System BIOS
- ☐ E. The hard disk drive

✗

ትክክለኛ መልስ

- ☒ C. Random access memory (RAM)

✗ 61. All of the following statements are correct except:

0/1

- ☐ A. In today's systems the fans and heat sinks are very large.
- ☐ B. Liquid cooling allows higher clock speeds and is quieter than using a fan.
- ☐ C. CPU speed is the speed in which data is delivered when a particular bus on the is being used.
- ☒ D. The FSB (front side bus) connects the CPU to the motherboard components

✗

ትክክለኛ መልስ

- ☒ C. CPU speed is the speed in which data is delivered when a particular bus on the is being used.

✗ 62. Which component of the Android OS stack is responsible for executing and managing app components like activities and services? 0/1

- ☒ A. Service manager
- ☐ B. Activity Manager
- ☐ C. Windows Manager
- ☐ D. Application Layer
- ☐ E. Application Frameworks
- ☐ F. Linux Kernel

✗

ትክክለኛ መልስ

- ☒ B. Activity Manager

✓ 63. What is the primary function of the Linux Kernel in the Android OS stack? 1/1

- ☒ A. It manages the device's hardware and system resources.
- ☐ B. It provides APIs for building Android apps.
- ☐ C. It handles user interface rendering.
- ☐ D. It manages application lifecycles.
- ☐ E. None

✓

✗ 64. What is the purpose of the Android Application Framework in the Android OS stack?

0/1

- ☐ A. It provides low-level hardware control.
- ☒ B. It offers a graphical user interface for app development. ✗
- ☐ C. It provides a set of APIs for building Android apps.
- ☐ D. It manages the device's display.
- ☐ E. All

ትክክለኛ መልስ

- ☒ C. It provides a set of APIs for building Android apps.

✗ 65. Which component of the Android OS stack provides a means for apps to share structured data, such as databases and content, with other apps? 0/1

- ☐ A. View System
- ☐ B. View System
- ☐ C. Content Providers
- ☐ D. Native Libraries
- ☒ E. Broadcast receiver ✗
- ☐ F. None

ትክክለኛ መልስ

- ☒ C. Content Providers

✗ 66. Which Android component is used for inter component communication and event handling, often in response to system-wide announcements? 0/1

- ☒ A. Content Provider
- ☐ B. Activity
- ☐ C. Service
- ☐ D. Broadcast Receiver

✗

ትክክለኛ መልስ

- ☒ D. Broadcast Receiver

✗ 67. What is the main role of an Android Broadcast Receiver? 0/1

- ☒ A. Managing background services
- ☐ B. Handling user interactions
- ☐ C. Listening for and responding to system broadcasts
- ☐ D. Managing data storage

✗

ትክክለኛ መልስ

- ☒ C. Listening for and responding to system broadcasts

✗ 68. Which Android component is primarily used to perform long-running operations in the background, independently of the user interface? 0/1

- ☐ A. Activity
- ☐ B. Content Provider
- ☐ C. Service
- ☒ D. Broadcast Receiver

✗

ትክክለኛ መልስ

- ☒ C. Service

✓ 69. What is the purpose of an Android Intent? 1/1

- ☐ A. It is used to initiate an Android application.
- ☒ B. It is a data structure that holds data passed between activities.
- ☐ C. It is a component for managing background tasks.
- ☐ D. It is used for declaring app permissions.

✓

Network Device Configuration (70 - 75)

2 ከ6 ነጥቦች

✗ 70. You want to add a new route to your windows server. Which of the following is the correct syntax to add a route to the routing table of the router? 0/1

- ☐ A. Rtable add 12.0.0.0 255.0.0.0 11.0.0.254
- ☐ B. Rtable add 12.0.0.0 MASK 255.0.0.0 11.0.0.254
- ☐ C. Route add 12.0.0.0 MASK 255.0.0.0 11.0.0.254
- ☒ D. Route add 12.0.0.0 255.0.0.0 11.0.0.254

✗

ትክክለኛ መልስ

- ☒ C. Route add 12.0.0.0 MASK 255.0.0.0 11.0.0.254

✗ 71. What should you do with the wireless router to help hide the wireless network from unauthorized users? 0/1

- ☐ A. Turn it off when it is not being used
- ☒ B. Enable WEP
- ☐ C. Disable SSID broadcasting
- ☐ D. Unplug the network cable from the router

✗

ትክክለኛ መልስ

- ☒ C. Disable SSID broadcasting

✗ 72. You are troubleshooting to determine why student X computer cannot connect to the Internet. What command would you type to view all of student X TCP/IP settings in a windows 10 command prompt? 0/1

- ☒ A. IPCONFIG
- ☐ B. IPCONFIG/ALL
- ☐ C. IPCONFIG/SHOWALL
- ☐ D. IPCONFIG/DISPLAYALL

✗

ትክክለኛ መልስ

- ☒ B. IPCONFIG/ALL

✓ 73. You wish to encrypt traffic between the wireless client and the access point during your mixed network configurations, but you don't have a wireless router that supports WPA or WPA2. What would you do to secure the traffic? 1/1

- ☐ A. Use a third party program to encrypt the traffic.
- ☐ B. Use WPA on the client but WEP on the router
- ☐ C. Use WPA2 on the client but WEP on the router
- ☒ D. Use WEP on both the client and the router

✓

✓ 74. If a network admin configure OSPF on all routers above, what is the designated router (DR) for the network, assume no loopback interfaces are configured here on all routers and you have only physical interfaces? 1/1

- ☐ A. 192.168.10.9
- ☐ B. 192.168.10.5
- ☒ C. 192.168.10.10
- ☐ D. 192.168.10.33
- ☐ E. 192.168.10.65

✗ 75. Which one is true about EIGRP?

0/1

- ☐ A. Support classless routing
- ☐ B. Use 224.0.0.10 multicast address for EIGRP routers update
- ☒ C. Use Diffusing Update Algorithm (DUAL)-to choose the best path from the source to the destination.
- ☐ D. Support for VLSM & CIDR
- ☐ E. All

ትክክለኛ መልስ

- ☒ E. All

Advanced Programming with Java (76 - 80)

2 ከ5 ነጥቦች

✗ 76. If multiple threads are waiting for an announcement and only one thread receives the announcement the other will have to wait more for a condition that has occurred. So, which thread function is used to wake up only one thread that is waiting or blocked within a synchronized method to share the same object? 0/1

- ☐ A. wait()
- ☐ B. notify ()
- ☒ C. notifyAll()
- ☐ D. sleep()

✗

ትክክለኛ መልስ

- ☒ B. notify ()

✓ 77. When we have a Student table that has firstName, surname, gender, studId and cgpa attributes on the Haramaya database. Also, the table has 10 rows of data that are stored on Student tables. Since, we need to fetch data from our database Student table, which one of the following java.sql classes is used to store the data that is fetched from our database table? 1/1

- ☐ A. Statement
- ☐ B. StatemetSets
- ☐ C. Result
- ☒ D. ResultSet

✓

✗ 78. Whenever a thread is inactive for an extent of time (not permanently) then, either the thread is in the blocked state or is waiting. So which event does not cause the thread become “Not Runnable state/ blocked state”? 0/1

- ☐ A. When the sleep() method is invoked
- ☒ B. When the thread calls the wait() method
- ☐ C. When The thread is blocked on I/O operations
- ☐ D. When the CPU resource is sufficient

✗

ትክክለኛ መልስ

- ☒ D. When the CPU resource is sufficient

✓ 79. Race condition occurs when two threads access a shared variable at the same time. The first thread reads the variable and the second thread reads the same value from the variable. Both threads are “race” to read values from the same variable and the variable will produce the wrong output. Therefore, how to avoid race conditions in multithreading programming? 1/1

- ☐ A. Using Thread asynchronization
- ☒ B. Using Thread Synchronization
- ☐ C. Using Shared Global Variable
- ☐ D. Using Shared CPU and other resources

✓

✗ 80. The RMI Registry is a naming service initiated using Java's "rmiregistry" tool. Which RMI, methods are used to register the server's object name in the RMI registry as remote objects at the registry URL(: rmi://<hostname>:<port>/<ServiceName>)? 0/1

- ☐ A. unbind(String URL, Remote object)
- ☒ B. unbind(String URL, Remote object)
- ☐ C. rebind(String URL, Remote object)
- ☐ D. lookup(String URL)

✗

ትክክለኛ መልስ

- ☒ C. rebind(String URL, Remote object)

IT Project Management (81 - 85)

3 ከ5 ነጥቦች

✓ 81. Which one of the following is the output of administrative closure process of communication project management processes? 1/1

- ☐ A. Project archives
- ☐ B. Formal acceptance
- ☐ C. Lessons learned
- ☒ D. All.

✓

✗ 82. In the project scope management “scope” refers _____

0/1

- ☐ A. All the work involved creating the products of the project and the processes used to create the product.
- ☒ B. The processes involved in defining and controlling what is or is not included in the project ✗
- ☐ C. The output that expected after the completion of project.
- ☐ D. The ways certain project communicated and integrated.

ትክክለኛ መልስ

- ☒ A. All the work involved creating the products of the project and the processes used to create the product.

✓ 83. Which one of the following methods used for selecting project in certain organization? 1/1

- ☐ A. Considering the broad need of the organization
- ☐ B. By categorizing the project based opportunity, directive and problem.
- ☐ C. Weighing score method
- ☒ D. All ✓

✗ 84. The formal document that recognizes the existence of a project and provides direction on the project's objectives and management is 0/1

- ☐ A. Project chart
- ☒ B. Project plan
- ☐ C. Scope statement
- ☐ D. None.

✗

ትክክለኛ መልስ

- ☒ A. Project chart

✓ 85. Which one of the following is true? 1/1

- ☐ A. scope, time, cost, and quality are triple constraint
- ☐ B. scope, time, cost, and quality are the not key knowledge area
- ☐ C. project integration management key knowledge area
- ☒ D. scope, time and cost triple constraint

✓

Data Communications and Computer Networks (86 - 90)

3 ከ5 ነጥቦች

✗ 86. _____ refers to the arrangement or physical layout of computers, cables, and other components on the network? 0/1

- ☐ A. Map
- ☐ B. Diagram
- ☒ C. Topology
- ☐ D. All.

✗

ትክክለኛ መልስ

- ☒ D. All.

✓ 87. Which one of the following factors affect the capability of network in selecting the network layout? 1/1

- ☐ A. Type of equipment that the network needs
- ☐ B. Growth of the network
- ☐ C. Network is managed
- ☒ D. All

✓

✖ 88. Which one is odd?

0/1

- ☐ A. SCTP
- ☐ B. ICMP
- ☒ C. IP
- ☐ D. IGMP

✖

ትክክለኛ መልስ

- ☒ A. SCTP

✓ 89. Which one of the following factor data rate depend on?

1/1

- ☐ A. The bandwidth available
- ☐ B. The level of the signals we use
- ☐ C. The quality of the channel (the level of noise)
- ☒ D. All

✓

✓ 90. _____ links two subgroups and ensures that what lower layers have transmitted is in form that the upper layers can use. 1/1

- ☐ A. Physical layer
- ☒ B. Transport layer
- ☐ C. Network Layer
- ☐ D. Presentation layer
