MESSAGE

from The President

Prof. Tassew Woldehanna

I am pleased to present the new Strategic Plan (2020-2030) for Addis Ababa University. For the past five years, the university has been implementing a strategic plan with a vision that was stated bold and clear to become “among the top ten pre-eminent graduate and research universities in Africa”. The Vision has been fully realized through the tireless efforts made by the university community in general and that of the commitment of leadership. The performance as witnessed by the remarkable improvement of its international ranking turned out to be a sparkling success both in the views of the university community and the stakeholders.

This new strategic plan, therefore, is developed based on the experiences gained from the previous strategic plan and considering emerging trends and developments nationally and internationally in the context of the higher education. Extensive consultations of all key stakeholders (both internal and external) and reviews of relevant policy documents have been done in the process of this strategic plan for the next ten years to be implemented in two five years period by continuously monitoring and evaluating the results of the plan.

Our vision for the period (2020-2030) is to “become a world class university and the leading research university in East Africa”. In launching this strategic plan, we are ushering in an exciting period of transforming AAU to a full-fledged Research University with full Institutional autonomy. The plan sets directions to elevate AAU to a renown world-class research University and the most preferred university in Africa. Hence our competition is becoming regional and global and therefore request the university leadership, staff, students and our stakeholders to scale up their efforts towards the attainment of our vision as we did in the past. Furthermore, I request all academic units (Colleges, Institutes and Departments/Schools) to cascade their plan and align with this plan and identify their contributions clearly towards the realization of the grand goals of this Strategic Plan.

I acknowledge and thank everyone who have been involved in the draft document preparation and our students, faculty, staff, executive leadership, alumni, Senate and Governing Board of Addis Ababa University for their valuable engagements.

Prof. Tassew Woldehanna
President of AAU

Executive Summary

Strategic planning for an institution is an important attribute of effective leadership, especially in the context of the 21st century higher education where competitiveness for resources and favorable attitudes of stakeholders are essential for success. Cognizant of these sound institutional needs for planning, Addis Ababa University has already made informed planning an essential part of its academic culture to articulate its institutional intentions, directions, and performances. Over the past couple of decades, the university has developed rich experience of planning to best design its academic programs and services and serve the society with the highest possible standards and quality. This culture of informed strategic planning demonstrates the high-level commitment of the university towards accountability to the Ethiopian tax payers' money, the principal source of its overall funding and existence.

For the past five years, the university has been implementing a strategic plan developed to effectively execute the goals set. AAU has endured all challenges of time and constraints of resources and has managed to excel in its academic performance and especially research, publications and performance as witnessed by the remarkable improvement of its international ranking as one of the best ten global universities in Africa. This improvement in ranking turned out to be a sparkling success both in the views of the university community and the stakeholders. As such the success of the foregoing strategic plan is the outcome of the tireless efforts made by the university community in general and that of the leadership in particular, to fully realize the university's vision that was stated bold and clear to become "among the top ten pre-eminent graduate and research universities in Africa by 2025". AAU has thus learned a great deal both from the theoretical process of developing a strategic plan and the practical successful implementation of the same on the ground.

This new strategic plan, therefore, is developed based on the experiences gained from the previous strategic plan and taking into account emerging trends and developments nationally and internationally in the context of the

higher education sector. The fact that this plan is being developed at a time when Addis Ababa University is considered as one of the research universities in Africa by ARUA and recently recognized by the Ethiopian Ministry of Science and Higher Education to be one of the national research universities is an opportunity for the university to revisit its full readiness to meet all the expectations bestowed on it. The new differentiation policy of higher education states that research universities are “universities where the focus is on research professors and graduate students conduct. These universities can be research extensive and/or research intensive. They may be oriented more towards graduate education, mainly Masters and PhD programs, but with relatively limited focus on undergraduate teaching,” (MoSHE, 2019). In terms of qualifying for a research university the policy document further states that a university to become a research university should have 50% or more PhD holders teaching and research staff and 30% or more PhD and/or Master’s programs students (MoSHE, 2019).

This new strategic plan is designed to guide AAU as a research university for the coming ten years 2020-2030 (to be implemented in two phases of five years each) mapping out the overall strategic directions of AAU and interfacing the same with the demands and needs of stakeholders both from within and outside the university. The new plan, therefore, has come up with a new vision for AAU: “being among the world class universities and one of the leading regional research universities by 2030.” AAU is also embarking with a newly crafted mission of a research university which is producing competent graduates, pursuing problem-solving and knowledge-expanding research outputs, and actively participating in scholarly community engagements in order to contribute to national, continental, and global development.

The new strategic plan has seven important and interrelated sections. The first section sets the scene. It briefly introduces AAU to the readership highlighting the historical millstones in its academic milieu since its establishment. This section depicts the need for timely strategic planning as well as the potential risks of failing to do so would entail.

Section two makes an overall evaluation and analysis of the current situation of Addis Ababa University so that the strategic plan rests on a firm base by capturing salient issues and processes that would receive the necessary emphasis in the process. The evaluation and analysis were conducted by assessing both the internal and external environments of the university and the broader context of the Ethiopian higher education. Strengths and weaknesses of the university and external opportunities and threats were identified using data collected during the focus group discussion and

interviews with the key stakeholders of the university. Document analysis and review of legislations, proclamations, policies, and international conventions were also carried out. The sources of the data rang from the broad academic staff to that of the university's top leadership.

Analysis of the data has led to the replacement of the previous missions and goals to address the contemporary trends and developments in the higher education sector. This section also considers the available and projected resource capacity of the university in the design of the new strategic plan.

Section three, four, five and six are logical sequels of section two in that the new strategic plan developed is framed based on the results of the data analyzed. These sections, therefore, depict the new strategic direction of Addis Ababa University by introducing the new vision, mission, goals, objectives, and performance indicators for the coming five to ten years. In addition to the vision and mission statements mentioned above, critical major strategic goals have been identified in these sections for the coming five to ten years.

Improving the effectiveness of the teaching-learning process and increasing graduate employability; building AAU's research capacity, producing scientific research and expanding knowledge frontiers; designing research and innovation agenda that address society's most pressing challenges; and providing transformative and scholarly community engagement are some of these important goals. Moreover, the list of goals further includes strengthening university-industry/school linkage and stakeholders' engagement and management; advancing good governance, effective leadership and participation; expanding national and global partnerships, networking and collaboration; and contributing towards the realization of UN SDGs and AU Agenda 2063 in higher educations. AAU plans also to provide opportunities and resources to attract, recruit, develop and retain the highest caliber academic and administrative staff, and to put in place and implement procedures and standards to assure the quality of education, research and community engagement for the coming ten years.

The intent statements in these sections were developed and enriched based on the analysis of the current context of Addis Ababa University from the perspectives of various stakeholders such as students, faculty, the government, and external stakeholders such as national and international organizations. The strategic directions are differentiated into the university level, academic unit level, and shared strategies. The shared functional strategies address strategies for various functions such as ICT, human

resource management, innovation, quality assurance, finance, procurement, community engagement, and communication strategies. Section four outlines the overall framework for the implementation of the university's strategic directions introduced in section three. The key content of this section is the detailed action plan developed as an instrument to implement the strategic intents of the university. The action plan interfaces the strategic goals and objectives with measurable performance indicators that would be easier for monitoring and evaluating performance. These sections also comprise actions that would facilitate the implementation of the grand university level strategy. Some of the implementing tools described in this section include stakeholders' management and business process management.

Section seven, the last part of the strategic plan, is the monitoring and evaluation part. It is needless to mention that a robust strategic plan should be accompanied by a rigorous and dynamic check and balance or monitoring and evaluation system so that it meets the targets in terms of success in implementation and producing the desired impact and outcomes in the community. The monitoring and evaluation part also underscore the fact that checking accountability and transparency in governance and leadership is instrumental in building the confidence of employees and stakeholders in the services provided by the University. This last section employs time-tested monitoring and evaluation tools including the identification of principal university-level critical success factors and key performance indicators.

This strategic plan is supposed to help the university leap forward in assuming its rightful and deserving high rank in regional and global academic position as a research university despite the looming spread of the COVID-19 pandemic.

1. Background to the Strategic Plan

1.1. Introduction

Modern and customer-oriented 21st century, institutions, higher academic institutions in particular can best address the needs of their esteemed stakeholders provided that they make a forward-looking plan to provide their services and products to their esteemed stakeholders in a manner that preempts risks and failures. A strategic plan is an instrument that enables an institution to cope up with uncertainties by making smarter choices among competing priorities, take initiatives, create synergies, and set the course for a sustainable future. It provides an opportunity to reflect on accomplishments, review previous documents and identify what needs to be done, and design strategies that will take the institution in the right direction.

This Strategic Plan of Addis Ababa University 2020-2030 is founded on the same principles that underlie sound strategic planning such as the need to create and sustain an enabling environment in which academic excellence (via teaching, research and innovation), academic freedom, democracy, inclusiveness, autonomy, and highly talented people can flourish. The plan articulates the vision, mission, strategic goals and objectives of Addis Ababa University for the coming five years with the implications for five years more. By so doing, it enables AAU to deliver high quality education; undertake problem-solving and cutting-edge research and knowledge generation; and engage the community for mutual transformation

The Plan is the result of an extensive participation from the University's community and lays groundwork to position AAU as a globally renowned research university describing its academic and infrastructural capabilities and its skilled workforce to undertake best graduate programs and state of the art research and community engagement accomplishments. What is more, it contributes towards the full realization of the University's potential to explore and effectively utilize new opportunities needed to achieve its vision. In this regard, the Plan has built on the lessons learned from the achievements and challenges encountered in the course of implementing the former (2023/24-2020) Strategic Plan.

Moreover, the Strategic Plan is aligned with the national direction of AAU being one of the national research universities and with this regard highlights the institutional capacities that will enable AAU successfully emerge as a popular preferred research and graduate university.

Finally, since the time of drafting this strategic plan coincided with the time when the

COVID-19 Pandemic hit the Global community and Ethiopia hard, it was essential to include coping mechanisms so that the University's main functions would continue running effectively in spite of the impact of the pandemic and remain resilient in the face of all challenges and influences.

1.2. The Need for Strategic Plan

In the course of its history, AAU has implemented several strategic plans. The last strategic plan AAU was that of the 2023/24-2020. During the period of this last strategic plan, AAU has enhanced its capacity and reputation for research, transformed the undergraduate curriculum, increased the number of postgraduate programs and enrolments, and become even more international, diverse and engaged. The University has already achieved its vision of being among the ten preeminent research and graduate universities in Africa in 2019, signaling its high capacity to leap forward to a new era of success and accomplishments.

The Strategic Planning Task Force of AAU set up in January 2020 made a thorough analysis of the context of contemporary higher education and reached the following observations as an important step in developing the strategic plan.

First, students nowadays are not the same as students during previous generations, so that the Addis Ababa University like any other forward-looking stakeholders-conscious university should adapt itself to requirements and aspirations of the new generation and the demands of the labor market. Students expect to learn using different teaching-learning styles and strategies and in a system that addresses their personal preferences, especially via technology. The demography of the student population is becoming increasingly diverse and represents a broader variety of backgrounds.

Second, Addis Ababa University has recently been categorized by the Ethiopian Ministry of Science and Higher Education (MoSHE) as a research university on top of its earlier recognition by ARUA as one of the research universities in Africa, where undertaking research, establish regional wide center of excellences, and running graduate programs are considered to be its prime missions.

Third, in light of the rapid changes and developments in all aspects of life, the university must respond to the expectations of the government, stakeholders, the public at country, regional and global levels.

Fourth, the COVID-19 pandemic is currently impacting on the conventional education systems and higher education institutions are required to introduce new modes of educational delivery such as a digital education system.

An attempt has been made to address the above observations in the process of developing this strategic plan through information and data collected using instruments such as document reviews, interviews and focus group discussion (FGDs). A series of FGDs were conducted with the University's leadership, management, senior professionals, faculty and students' representatives. The reviewed documents are from internal sources (such as annual plans, annual reports and the existing strategic plan) and external sources (such as the Higher Education Proclamation 2019, the national educational roadmap, the United Nation (Sustainable Development Goals) SDGs, the African Union Agenda 2063).

Findings and observations secured from the data collected were rigorously analyzed to formulate the Strengths, Weaknesses, Opportunities, and Threats (SWOT) of the University's core processes (strategic themes). A Baseline (2019/20) survey was also conducted as part of the SWOT analysis and in order to use it for setting strategic targets, objectives and performance indicators. The Plan has further been consolidated through face to face and on-line workshops, discussions and public engagements with the university leadership, management, senior professionals, high level experts and the university community.

Building on the successful accomplishments of the previous plans, this new Strategic Plan enables the university management to focus on identified critical areas to reinforce its strengths, seize opportunities, remove weaknesses and mitigate challenges, and take initiatives to achieve an all-round excellence in all the university's programs and functions to meet international standards and effectively respond to the dynamic and complex societal needs and aspirations.

This Strategic Plan is designed with two complementary approaches in perspective; namely, Balanced Score Card (BSC) and Adaptive Systems Approach (ASA). While BSC is a planning and measurement tool that helps to focus on critical issues that have ramifying effects on the whole system, ASA considers HEIs as complex and adaptive to changing conditions. HEI systems have many diverse and specialized components which continuously interact with each other leading to the emergence of new issues. They are adaptive in that they have the capacity to change under the influence appropriate interventions and positive feedbacks. Thus, in complex adaptive system, the whole is more than its parts.

1.3. A Brief History of Addis Ababa University

AAU is a pioneer Higher Education Institute (HEI) in the country, established in 1950 as University College of Addis Ababa (UCAA) and later named as Haile Selassie I University (HSIU), which in turn, renamed as Addis Ababa University in 1974. Some

of the university's faculties located outside Addis Ababa have grown into full-fledged universities including Haramaya University (the then Alemaya University), University of Gondar, Bahir Dar University and Hawassa University.

Beginning with 33 students in 1950, as of June 2020 AAU has a total enrolment of 46,873 students and 8,762 staff (2,987 academic staff, 138 technical assistants, 4,497 administrative and 1,202 health professionals). It currently runs 73 undergraduate and 366 graduate programs (96 PhD, 210 Masters' and 60 specialty and sub-specialty) in its ten colleges, two technology institutes and 11 research institutes (four of which run graduate programs) indicating that the university is heading to becoming a graduate research university. AAU has introduced various research grants including Thematic Research, Adaptive Research and Seed Grant as well as Women Research Grant (in collaboration with SIDA) and the number of reputable journal articles and books published has increased over the last years. In the meantime, MoSHE has recognized AAU as a research university making research as the core function of the university.

The University is led by a President who is assisted by four Vice Presidents and three Executive Directors: Academic Vice President, Vice President for Research and Technology Transfer, Vice President for Administration and Student Services, Vice President for Institutional Development, three executive/scientific directors: Director of College of Health Sciences (with the rank of Vice President), Director of Addis Ababa Institute of Technology (with the rank of Vice President), Scientific Director of Ethiopian Institute of Architecture and Building Construction.

Cognizant of the need to sustain and supplement the achievements of the previous reform efforts and to keep pace with its prominence nationally and globally, the University has embarked on designing this fourth Strategic Plan 2020-2030 in alignment with the national plan and making AAU a world class university.

1.4. Review of Ethiopian Higher Education Sector

Higher education in Ethiopia began expanding in an unprecedented pace following the coming into power of the Federal Democratic Government of Ethiopia in 1991 G.C. Encouraged by the relatively relaxed investment initiatives, the Education and Training Policy issued in 1994, the new international trends in higher education, and the Higher Education Proclamation 650/2009 (which was recently improved by Proclamation Number 1152/2011), a sharp increase was felt in the expansion of the Ethiopian higher education sector. A new dawn of expansion of universities broke farther and brighter.

While Ethiopia realized steady and rapid economic growth in the last two decades as verified by the World Bank (2020/21) and IMF (2009) higher education has also enjoyed

tremendous expansion in creating access to citizens. Universities were opened almost in all regions and major towns of the country. The newly flourishing higher education institutions could not however meet the need for qualified human resources.

Following a national study on the education system of the country, a National Education Roadmap was designed in 2019 to ameliorate the drawbacks that have fettered the educational system and leap frog it to higher level with the to serve the age-old societal needs. One of the important outcomes of the roadmap is differentiation of the universities into different categories so that become focused in their specific missions and capabilities to effectively discharge their societal and epistemological responsibilities.

Accordingly, AAU is categorized in Research University group based on its academic and research potential, performance and opportunities. The focus of Research Universities is mainly on research and graduate programs. Hence, AAU will give priority to quality of education and employability of its graduates while also enhancing its research capacity to advance the frontiers of science and solve societal problems. It will admit manageable number of students and prepare them with the requisite skills for the labor market and creating jobs. AAU will work aggressively towards internationalization of its programs.

1.5. Organization of the Document

This Strategic Plan of AAU for the years 2020-2030 has major sections; namely, background to the strategic plan, an analysis of the existing situation of AAU, resources, identification of strategic issues, strategy formulation, strategy implementation, monitoring and evaluation.

2. Analysis of the Existing Situation of Addis Ababa University

An assessment of the internal and external environment is a critical stage to understand the current situation of AAU in terms of its strengths, weaknesses, opportunities and threats. PESTL framework is used for the analysis of the external environment.

The framework covers issues related to political, economic, societal, technological and legal issues, which directly or indirectly impact the higher education sector. Vision, Mission, Goals, Objectives, Strategies and Tactics (VMOST) framework and other tools are used for undertaking internal environments analysis.

2.1. Assessment of the External Environment – PESTL

The external environment has been analyzed in terms of opportunities (i.e., chances that will bring positive impacts in) and threats (i.e., obstacles that can negatively affect) AAU's initiatives. The PESTL framework (Table 1) is used to organize the opportunities and threats arising from political, economic, societal, technological, environmental and legal issues.

Table 1. Opportunities and threats

S. No.	Factor	Opportunities	Threats
1	Political	Growing attention to higher education by the government through the establishment of a new ministry, MoSHE, that manages higher education sector. Conducive government policies, proclamations and strategies such as the national general education roadmap. Government readiness to broaden national free/scholarly community engagements Reclassification of higher education institutions based on mission and AAU emerging as a research university Government commitment to optimum budget and resource allocation for higher education Government's commitment to support AAU as a university of universities so that AAU trains teachers for other new universities. Introduction of exit exam for graduates. AU agenda 2063 for resource mobilization	External influence and tight government regulations and policies that coerce institutional freedom in academic matters (e.g., MoSHE's intervention in curriculum development), ad hoc letter to assign student beyond the legal and formal mechanisms and administrative affairs (such as financial and human resource management) Harmonizing universities' programs and curriculum across the country such an act inhibiting AAU to design its programs taking its geographic advantages, staff resource, and other factors More preoccupation with quantity/number of graduates than their quality Risks and uncertainties being caused by the COVID-19 pandemic Political and national insecurities and instabilities

S. No.	Factor	Opportunities	Threats
2.	Economic	Increasing employment opportunities for qualified graduates because of economic growth such as industrial park development Rising demand for problem solving research, innovative products and consultancy services from stakeholders The launch of graduate loan services Availability of high potential for public-private partnerships Effects of globalization and regional integration	Increasing cost of living Shortage of foreign currency Higher rate of inflation Shrinking economic growth as a result of direct and indirect impacts of COVID-19 and emerging pandemics Increasing graduate unemployment in some programs and disciplines High staff turnover due to push and pull factors
3.	Social	Diversified and large student population in general education The creation of opportunity to attract competent local and foreign students in some programs The rise of positive social attitude towards higher education and its output Increasing societal demand for education, research, scholarly community engagements and partnership Increasing international networking opportunities as a result of various governmental and non-governmental initiatives Greater commitment to SDGs (quality, gender, sustainability, health, etc.) High demand for continuing education and more revenue from the services	Rising stiff competition from local public universities to attract students, solicit fund and grants Poor educational background of students and poor readiness High unemployment rate of graduates Looming challenges and risks in the education sector as a result of the rapid expansion of COVID-19 infection. Substance abuse (drug abuse, chat, cigarette, alcohol, etc.), and declining social norms and ethical values Staff brain drain

S. No.	Factor	Opportunities	Threats
4.	Techno-logical	Availability of open source and free digital resources (courses, software solutions, up-to-date articles, e-books, labs, computational resources) for teaching and research Proliferation of platforms for new modes of delivery (like online teaching) Increasing demand for innovative technologies and products Access to the use of telemedicine for health services and mobile banking for financial transactions Increasing number of ICT conversant/proficient students Emerging opportunity as a result of emerging technologies in data-science and artificial intelligence enabled solutions	Lack of qualified and skilled human resource in the market Increasing digital (resources and skills) gap among students Misuse and abuse of technology and technological products Limited ICT infrastructure in capacity, coverage and service quality Insecurity in data management and reliability and validity of data Power outage and interruption in the use of critical facilities such as labs and ICT equipment
5	Environmental	Convenient geographic location: being located in the capital city, which hosts international and regional organizations Massive infrastructural investment in the city and the resulting demand for new design and operation principles (in architecture, construction, project management, landscape beautification, ICT, power, financial management, etc.) Conducive climate of the capital city Government's interest towards green economy, environmental protection, the beautification of Addis Ababa, and the natural resources conservation Increased funding opportunity for environmentally sustainable solutions, efficient energy resources and data-science and artificial intelligence enabled solutions	Unpredictable effect of climate change and environmental degradation Poor sewerage and waste water management/treatment and increasing pollution Increasing traffic congestion and poor traffic management (hindering staff mobility) Recurrent draught, desertification, and desert locust effect on the food security

S. No.	Factor	Opportunities	Threats
		Push/trend to adhere to global standards in local and FDI funded industries	
6	Legal	The provision of new guidelines and directives in regulating university-run income generation business Conducive legal environment to run demand-driven academic programs, research and community/advocacy services Enabling legal environment to establish relationships with local and international partners Membership of African Research University Alliance (ARUA), Association of African Universities (AAU), member of Global Academy of Liberal Arts (GALA), and Africa UNInet	Lack of full autonomy and interventions – some aspects of national laws, institutions (like Civil Service) and Higher Education Proclamations are prohibitive for growth and transformation Restrictive regulations (finance, human resource, purchasing, job evaluation and placement, salary scale, use of internal revenue, ...) that inhibits the internal operations of the University External interference in the implementation of JEG and poor design of the JEG itself. Custom constraints for importing educational equipment

2.2. Assessment of the Internal Environment

The internal environment of AAU highly influences its ability to effectively implement initiatives. Hence, the internal strength (i.e., areas that distinguish AAU and those which it can capitalize on) and weaknesses (i.e., areas that AAU could improve or avoid) have been assessed based on the FGD conducted with key stakeholders using critical success factors and the alignment and appropriateness of the previous strategic intent using Vision, Mission, Goals, Objectives, Strategies and Tactics (VMOST) framework. Table 2 shows the strengths and weaknesses of AAU.

Table 2. Strengths and Weaknesses of AAU

S. No	Issues	Strengths	Weaknesses
1	General	Attractive brand, better visibility and good reputation/image of the University	Inability to capitalize on the existing good image.
		Ranking the 10 th among African Universities in research and publications	Low visibility of the opportunities and unique capabilities in the academic and research arena to the international community
		Being the oldest and largest university in the country with rich experience/resource in all domains (staff, facility, enabling policies and regulations built and developed over the years)	Lack of full autonomy – some aspects of national laws, institutions (like Civil Service) and Higher Education Proclamations are prohibitive for growth and transformation
		Wide-ranging networks and collaborations with local and international universities and partners	Inability to fully utilize AAU's alumni for resource mobilization, image building and solicit partnership
		Good mix of experienced and young staff committed to improvement	
		A preferred employer/university for professionals	
		Free health service at Black Lion Hospital for all AAU staff	Limited capacity to treat non-communicable diseases at Tikur Anbesa Hospital
		The availability of national museum of Ethiopian studies, the natural history museum. The national herbarium for tourism attraction and biodiversity management	
2	Leadership	Leadership appointment based on merit and competition.	Not fully communicating the vision, missions and strategic plans and inability to create common and shared vision and values among the University community.
		Reasonable participation of women in top leadership.	Low participation of women in middle and lower lever management positions
		Collegial and committed leadership (e.g., to equitably distribute resources and opportunities, take prompt action and manage large number of staff)	Incomplete devolution of power to lower level units as a result of insufficient accountability and enforcement mechanisms, and poor chain of command in decision making.

S. No	Issues	Strengths	Weaknesses
		Establishment of new organizational structure and management systems, e.g., Human Resource (HR), Finance, Registrar, Publication Management	Insufficient resource generation (for teaching and research) schemes and incentives for staff retention (internal revenue distribution, catering services, wellness facilities, housing, transportation, day-care and schools) Poor document and data management Limited capacity to diversify internal revenue generation
			Weak strategic executions, no regular quality audit, undue focus on non-value adding activities, and weak coordination among AAU units.
			Incomplete academic freedom.
			Inadequate short-term skill and professional development trainings including computer skills, English language proficiency and Communication skills, and research methods
			Redundant/overlapping organizational structure - too many directors, significant number of qualified staff is now assuming administrative positions and detached from full participation in teaching and research.
			Little flexibility for policy revision and development as well as reduced initiative to introduce new/innovative approaches
			No clear communication channels and dissemination strategy to work with the public media.
			Unplanned expansion and lack of expansion plan.
			Lack of full knowledge of the existing resources; little or no attention to critical resources.

			Lack of inter-campus or intra campus communication and interaction among the student community to instill the culture of sharing views, manage diversity, increase students' participation in AAU affairs, etc.
			Inability to harness the power of ICT and technology to automate the system to improve most of the activities (e.g., simple reports are still being processed manually while open source solutions are already in place).
			Inadequate audit/program evaluation on the relevance of some programs: existence of out-of-date, individuals-based, donor-driven or duplicated programs.
			Lack of robust education quality management system; lack of a coherent quality management structure down to colleges and academic units despite the deteriorating quality of teachers and facilities.
			Lack of sufficient attention to graduate programs (e.g., students take unnecessarily extra years to graduate in PhD programs).
3	Teaching-Learning	Admission of high performing and disciplined students	Poor quality and less employability of graduates.
		Admission of international student	Few international students relative to the total student population both in the graduate and undergraduate programs
		Good teacher-student relationship	Sexual harassment and lack of awareness of victims about the presence of appeal mechanisms
		Availability of special programs (e.g., the Arts) and diversified programs	Occurrence of academic misconduct and dependence on peers (cheating, plagiarism, and substance abuse)

	Academic programs are subject to continuous program review	Lack of national program accreditation, coherent quality assurance policy and internal quality audit and quality control mechanism.
	Admission of Foreign students has increased	Poor observance of academic calendar and progress mechanisms (uniformity in registration, instructor assignment, day-one-class one, academic calendars, class schedules, proper progress of courses, consultation hours implementation, course evaluation and grading irregularities, course sequencing, implementation of practical aspects of courses, teacher's performance evaluation, academic advising, availability of resources)
	Internship has become part of the undergraduate program	Lack of student support services such as information centers, language centers, financial support/loan services, extra-curricular activities, career development services
	There are diversified graduate programs	
		More emphasis on theory than on practice in teaching such as labs, workshops, field visit, internship, practicum, externship; Poor university-industry/school linkage.
	Entrance exams are being given to all graduate program applicants	Poor English language proficiency and students' engagement in their education; poor students' learning achievement
	Many graduate students are attending trainings abroad	Lack of sufficient research infrastructure (office blocks, laboratories, digital library and housing units) for PhD candidates.
	Teacher-Student and Student-classroom ratio have improved (1:9 and 1:30 respectively in 2018/2019)	PhD students take longer time to complete their studies
	Continuous assessment is practical across many programs	Inability to engage students in national and international issues.

S. No	Issues	Strengths	Weaknesses
		Tracing study of graduates of AAU initiated	Little or no stakeholder engagement in program and curriculum design and implementation and evaluation.
		Job fair expo involving employers and graduates has been conducted	Duplication of undergraduate courses and programs in the graduate programs
		Several collaborative programs from the United States, Australia, Great Britain, Belgium, Germany, and South Africa are opened in AAU	Chronic educational and research lab problems
		Availability of centers of excellence to attract international students	
		Availability of Unique programs like in visual and performing arts	
4	Academic staff	Availability of qualified and experienced academic staff	Shortage of qualified academic staff in some disciplines.
		Availability of young staff willing to learn new approaches and harness technology	Prevalence of high level of absenteeism from class and low level of staff engagement and commitment in conducting classes timely and regularly, conducting classes and evaluations properly, and supporting students
		Ability to attract qualified professionals for teaching, student supervision and evaluation.	More senior staff in management positions than on teaching and academic activities.
			Unnoticed dual employment of academic staff outside of the University rather than focusing on their day-to-day activities within the University.
			Prevalence of sexual harassments of academic staff on their students and presence of ethnically biased treatment of students by academic staff
			Presence of professors who do not generate research grants for the wider university and the participation of graduate students in their research
			Poor English language proficiency, professional knowledge and teaching skills of some academic staff

S. No	Issues	Strengths	Weaknesses
5	Infra-structure (physical and ICT)	Resource accumulated throughout the history of the University enabling it to conduct effective teaching-learning and research	Inadequate classrooms, smart classes, halls, and video conferencing facilities/platforms
			Sub-standard offices, poor employee services (transportation, gym, cafeterias); poor job satisfaction
		Growing investment on e-learning platforms development	Poor management of shared resources
		Beautiful campus landscape and scenic beauty	Poor dormitories, with insufficient facilities and services
			Lack of sufficient and clean toilets in the campuses
			Lack of power backup, power supply, especially to libraries and laboratories
			Poor ICT infrastructure, services, skill and content management
			Poor recreational services (catering, cafes, sport facilities, laundries, beauty salons, etc.)
6	Administration support service (Finance, procurement, HRM, facility)	Presence of improved organizational structure and system	Poor administrative functions and process –Prevalence of bureaucratic red-tape in internal processes, poor procurement systems
		Availability of limited but experienced staff that can discharge responsibilities and handle tasks with diligence.	Lack of continuous professional development (CPD) for the support staff (via formal education, trainings, motivational speeches)
			Shortage of committed and capable workforce to implement changes and new initiatives
			Poor maintenance

S. No	Issues	Strengths	Weaknesses
6	Admin- istration support service (Finance, procure- ment, HRM, facility	IFMIS and ICMIS is fully custom- ized to AAU finance and personnel management	Lack of proper incentive pack- ages (both in kind and cash) and retention strategies such as - staff housing, daycare and community school, gym, theatres, consumer cooperatives, healthcare, trans- portation, cafeteria and catering service, shopping centers, bonus, proper distribution of internal revenue, maintenance and garage services for staff cars
			Lack of proper reward and pun- ishment enforcement mechanisms (lack of proper performance man- agement system).
			High employee turnover and many vacant positions
			Engagement of employees in ac- tivities outside of the University.
			Lack of recognition of the contri- bution of administrative staff to the university and mismatch of interest with the academic staff.
			Lack of integrated information management system (student, management processes and enter- prise resource planning.
7	Research and inno- vation	Significant contribution to national economic, political and social affairs (e.g. the GERD negotiation)	Inadequate research funding and poor-quality graduate research outputs
		Increased number of publications from year to year that significantly contributes to solving pertinent problems and improvement of AAU's ranking.	Research outputs and innova- tive products/ideas have limited impact/contribution to national development.
		High quality of collaborative re- searches	As a research-oriented university, limited number of research labs exist for graduate research
		Provision of publication incentives to encourage research	Lack of institutional research policy (from fund soliciting to closure).
		Availability of research grants – adaptive and thematic research, collaborative research, and female staff research.	Inadequate fund for graduate research.

S. No	Issues	Strengths	Weaknesses
7	Research and innovation	AAU has strong culture of producing high quality research output published in high impact factor journals such as Science and Nature. Moreover, AAU staff has rich experience involving in world and regional wide research projects and produce joint articles with international scholars. AAU has research automation system called CONVERIS.	Not fully automated research grants and calls gathering, dissemination and notification mechanisms.
			Poor research agenda setting and prioritization.
			Limited capacity for organizing local and global conferences, seminars, and workshops for dissemination and visibility
			Lack of initiatives for crowd funding and commissioned research.
			Lack of reliable and secured electronic data repository system as well as clustered high-performance computational facilities to conduct state-of-the-art and computationally intensive research.
			Lack of database for publication and research output management.
			Limited financing for research publication and conference participation
			Bureaucratic red tape and inability to use external fund (for travel, field expenses and purchasing equipment).
			Lengthy application and approval process for thematic and adaptive research and weak dissemination of research outputs
			Lack of research capacity building center
			Poor government research fund allocation of the total AAU budget
8	University-Industry linkage, technology transfer and Community Engagement	Renewed interest for internship and placement of a new structure to coordinate the activity.	Lack of research/knowledge commercialization center
		Availability of incubation center to cultivate and nurture innovation	Low contribution of staff to the community relative to expectations of latter.
			Weak university-industry set linkage.
			Weak culture of innovation and technology transfer

3. Resources (Human, Financial, Physical, Information)

3.1. Human Resource

Addis Ababa University has a total of 8822 staff. These are 2987 academic staff, 138 technical assistants, 4495 administrative staff and 1202 health professionals.

3.1.1. Academic Staff

Addis Ababa University has a total of 2987 academic staff, of which 4.25% are Professors, 39% are Associate or Assistant Professors and 56.6% are lecturers and below in academic rank. Women comprise 16.2% of the academic staff, and this percentage decreases to 9.6% when the percentage of women assistant professors and above academic rank is considered. Only 2.4% of the academic staff are expatriates. The academic rank of the technical staff is low compared to the academic staff.

Table 3. Academic and technical staff profile of AAU

Educational level	Academic staff			Technical Staff		
	Quantity		Total	Quantity		Total
	M	F		M	F	
Diploma	0	0	0	32	7	39
First degree	449	203	652	60	20	80
Master's degree	1146	212	1358	4	1	5
Doctorate degree	746	47	793	0	0	0
Others	79	45	124	7	7	14
Total	2420	507	2927	103	35	138

3.1.2. Administrative and Support Staff

Only 38.3 % of the administrative staff have received higher education while and the remaining are trained to diploma and lower levels.

Table 4. Administrative and Black Lion Hospital staff profile

Educational level	Administrative staff			Black Lion Hospital Staff		
	Quantity		Total	Quantity		Total
	M	F		M	F	
Diploma	300	689	989	12	24	36
First degree	305	339	644	376	658	1034
Master's degree	49	38	87	55	48	103
Doctorate degree	0	0	0	3	2	5
Others	826	1949	2775	11	13	24
Total	1480	3015	4495	457	745	1202

Table 5. Summary of overall staff profile

Job categories	Quantity		Total
	M	F	
Academic Staff	2420	507	2927
Administrative Staff	1480	3015	4495
Technical Assistants	103	35	138
Health Professionals	457	745	1202
Total	4460	4302 (49.09%)	8762

Table 6. Academic staff by Academic Rank, Country of Origin and Gender

Academic Rank	Country of Origin			Gender			Pro- por- tion (%)	Cum- lative (%)
	Ethiopian	Expa- triate	Total	F	M	Total		
Professor	109	18	127	3	124	127	4.25	4.25
Associate Professor	298	23	321	17	304	321	10.75	15.00
Assistant Professor	824	25	849	112	736	848	28.39	43.39
Lecturer	1,193	6	1,199	233	966	1199	40.14	83.53
Assistant Lecturer	324	0	324	59	266	325	10.88	94.41
Graduate Assistant	53	0	53	30	21	51	1.71	96.12
Technical Assistant	116	0	116	30	86	116	3.88	100.00

First Degree 15.18 %, Master's Degree 38.36%, PhD. 32.97% others 13.49%

The human capital of AAU determines its success and the realization of its vision. In recent years, AAU has also been utilizing the intellectual power of the strong Ethiopian diaspora for teaching and advising.

3.1.3. Financial Resources

Addis Ababa University is a government funded University. It has received close to 2.6 billion Birr for 2020-21 fiscal year from the government as recurrent and capital budget. The University also raises additional 600 million as an internal revenue and research grants. The University has implemented Integrated Financial Management Information System (IFMIS) to support the management of budgetary, financial and accounting operations. This helps the university to produce timely, relevant, and reliable financial data to promote fiscal discipline, assist resource allocation, improve operational efficiency and transparency. The following are the main sources of funding for Addis Ababa University.

- ◆ Government Funding: Even though there are government resource constraints every year, education is still the major priority area for government budget allocation.
- ◆ Internal Revenue: AAU generates substantial amount of revenue from internal sources. However, the effort needs much improvement.
- ◆ Grants: AAU gets substantial amount of grant funds from its strategic partners. However, utilization and reporting needs improvement to maintain the trust and the attention of donors as strategic partners.
- ◆ Property/Physical asset: The physical assets or investment in infrastructure is the result of effort made by Addis Ababa University for more than sixty years. However, the buildings and the laboratory equipment are out of date and worn out which require serious maintenance or replacement

3.1.4. Learning-teaching Resources

Learning-teaching is one of the core businesses of AAU. The University has been investing in building and renovating classrooms, libraries and digitization of the learning teaching environment. The University has 480 teaching classrooms across all its campuses and 40 smart classrooms. The University library has one central and 22 branch libraries. The library has a total of 10,000 seat capacity, 248,000 in print books, 210,000 e-books and more than 3,500 subscribed journals through Science Direct.

3.1.5. Research Resources

The various colleges have modest teaching laboratories but not adequately equipped for research. Though not adequate, research institutes have better laboratory equipment where academic staff may conduct collaborative research. Most of the academic and other units in AAU do not have sufficient laptops, functionally connected to printers and photocopy machines.

AAU provides research fund to its staff through various scheme including Thematic Research, Adaptive Research and Women Research Grant (in collaboration with SIDA). Academic staff win competitive international research grant for collaborative research. The bureaucratic red tape in finance and procurement processes are serious stumbling blocks hindering completion of research activities on time.

3.1.6. Image and trust

AAU has been operating at global standards with world class academic staff since its establishment. In addition to its immense contribution to the socioeconomic development of the country, many prominent African leaders have studied in AAU. Its positive image, both nationally and internationally has been well positioned. The leadership of AAU is committed to work in maintaining this good image among stakeholders. Its location in Addis Ababa, the capital city of Ethiopia the third diplomatic center in the World, confers it a geographic advantage for its prominence and visibility as a national heritage and a flagship university in Africa. Recent ranking by many university ranking agents indicates that AAU in one of the top 10 Best Global Universities in Africa, 13th in Africa and 2nd in Sub Saharan Africa based on research performance in 2019.

4. Identification of Strategic Issues

Based on the SWOT analysis and the strategic intent of the university leadership, the following strategic issues have been identified for AAU to focus on in the coming five to ten years using the data compiled from the various sources.

4.1 Strategic Issues

The following 12 strategic issues of AAU are identified to be addressed in the Strategic plan:

1. Institutional autonomy, Governance and leadership;
2. Teaching-learning access, relevance, quality and graduate employability;
3. Research capability and prioritization of agenda to stakeholders needs;

4. University-industry linkage, partnership and community engagement;
5. Internationalization (student, staff mix) and visibility;
6. Center of excellences and capacity development;
7. Information communications technology capacity, infrastructure development and identity;
8. Total Quality Management and stakeholders' satisfaction;
9. Alignment to national, SDGs and African Union (AU) agenda;
10. Talent management, equity and performance;
11. Internal revenue generation and resource mobilization;
12. Univer-city agenda and transforming engineering and technology programs.
13. Home grown and collaborative PhD. Programs

4.2. Stakeholder Identification and Analysis

AAU has been undertaking three fundamental functions namely teaching-learning, research and innovation, and community engagement. The value propositions of stakeholders in terms of three major functions of the university have been identified (Table 7) and their associations with the activities of the university.

Table 7. Stakeholder identification

Stakeholders		Revenue impact	Degree of influence	Extent of direct benefit from the service	Degree of importance as per the mandate	Sense of urgency required for request made	Frequency of contact
Internal	Stakeholders	University leadership	High	High	High	High	High
		University staff	High	High	High	High	High
External	Regulator	Government	High	High	High	High	Medium
		/MoSHE/ MoE					
	Customers	Students	High	High	High	High	High
		Students	Medium	High	High	Medium	Medium
	Stakeholders	Public	Medium	High	High	Medium	Low
		Local community	High	High	High	Medium	Medium
		Higher education institutions	Low	Medium	Medium	Medium	Medium
		international community	Medium	Low	Medium	High	Low
	Stakeholders	Donors and alumni	Medium	Medium	High	High	Medium
		University Board	High	Medium	High	High	Low

Table 8. Customer/Stakeholder Value Proposition

Customer / stakeholder	Required/ expected product/ service	Service/Product attributes				Relationship	Image
		Function	Quality	Timeliness	Price/Cost		
Internal Customers							
Students	Quality education	Produce competent graduates with entrepreneurial skill, and up-to-date and sellable knowledge	As per national/global standard and market demand	As per program durations	Reasonable and/or shared cost	Learner centered and inclusive	Compelling institution
Internal Stakeholders							
University leadership	Quality leadership	Accomplishing the vision, missions, and cherished values	Effective and efficient service	Throughout its operation	Good governance	Collegial, participatory, and inclusive	Reputable and exemplary
University staff	Quality teaching and administrative services	Conducive working environment	Effective and efficient service	As per their employment contract	High performance	Collegial /participatory	Compelling place to work
External Customers							
Government /MoSHE/ MoE	Quality education	Knowledgeable, skilled, and employable graduates	As per national standard and market demand	Annually	As per the country's civil service standard	Mutually supportive	Credible development partner
External Stakeholders							
Employers (businesses and industries)	Competent graduates, appropriate technology and knowledge	Knowledge, skills that improve efficiency and effectiveness in production and service provision	Fitness - to - purpose	Continuous	Market-based	Partnership	Attractive/ reputable

University Board	Efficient and effective	Good Governance	Fitness - to - purpose	Continuous	Cost effective	Cooperative and responsive	Attractive/ reputable
Public	Competent graduates	Alleviate national problems	Competent, ethical, and need based	Suited to their needs	Affordable	Partnership	Public acceptance
Local community	Need-based community engagement	Alleviate community problems through scholarly engagement	Addressing and solving societal problems	Suited to their needs	Covered by both the community and the university	Mutually beneficial	Societal acceptance
Customer / stakeholder	Required/ expected product/ service	Service/Product attributes			Relationship		
		Function	Quality	Timeliness	Price/Cost		Image
Higher education institutions	Skilled and knowledgeable human and material resource sharing	Capacity building and collaboration	Competent graduates, quality training and research output	As per their need and agreement	As per government policy and agreement	Collaborative	Credible partnership
International community	Research and development; meeting international expectations as stated in SDGs, Agenda 2063, etc.	Collaborative projects	Demand-driven and problem solving	Sustainable	As per the project	Partnership	Trust
Donors and alumni	Financial support and experience sharing	Research grants, scholarships, technology transfer	Transformative	Priority- and demand-based	As per government policy and agreement	Supportive and partnership	Credible and collaborative partnership

5. Strategy Formulation

The major strategic intents of AAU of the previous strategic plan namely, vision, mission and strategic goals have been analyzed and assessed. The phasing out strategic intents were replaced by new strategic intents in light of new trends and developments in the higher education.

5.1.Strategic Intent

5.1.1. Vision

Become a world class university and the leading research university in East Africa.

5.1.2. Mission

The mission of Addis Ababa University, as a research university, is to produce competent graduates, pursue problem-solving and knowledge-expanding research outputs, and actively participate in scholarly community engagements in order to contribute to national, continental, and global development.

5.1.3. Core Values

AAU adheres to the following core values:

1. **Excellence:** The University commits itself to the attainment of the highest standards in academic performance by delivering high-quality programs, promoting excellence in research and scholarly community engagement, and engaging the community in all university functions.
2. **Innovation:** The University promotes the development of innovative ideas that are marketable and that address societal needs.
3. **Academic freedom:** The University upholds high academic freedom as its core value; where all members of the university community exercise full right for free expression of thought, scholarly dialogue, and fact-based ideas.
4. **Responsibility and accountability:** The University ensures academic and non-academic responsibility and accountability through responsible decision making and prudent management of resources entrusted to it.
5. **Integrity and honesty:** The University fosters honesty, integrity, fairness and ethical and professional codes of conduct in its teaching-learning, research, and managing of its resources.
6. **Unity and inclusiveness:** The University embraces inclusiveness and promotes multicultural awareness, tolerance, unity, participation and equal opportunity of employment, education and decision making.
7. **Customer focused:** The University strives to provide high quality services and benefits to its customers effectively and efficiently.

1.1.4. Strategic Themes and Results

Strategic themes are the critical matters that indicate the “Pillars of Excellence” through which the University excels and creates value for customers and stakeholders by decomposing its vision into operational components. Thus, AAU’s vision is decomposed into four areas of excellence namely; Learning-teaching, Research and technology transfer, Scholarly Community engagement, strategic partnership and resource generation and management, and Good governance and diversity management. The strategic Themes of AAU is given 9.

Table 9. Strategic themes of AAU

Strategic Themes	Strategic Results
1. Excellence in learning-teaching	Competent and employable graduates
2. Excellence in research, technology transfer and knowledge management	Cutting-edge and problem-solving knowledge and technology produced, adopted, adapted, managed and transferred.
3. Excellence in scholarly community Engagement, strategic partnership, and resource generation and management	Communities engaged, Society and partners satisfied, revenue increased and self-reliance ensured.
4. Excellence in good governance and diversity management	Customers satisfied, gender equity, multiculturalism, and fairness realized.

5.2. Strategic Goals

This new strategic plan of AAU consists of 12 corporate goals, as presented in Table 10.

Table 10. Corporate goals of the strategic plan

S. No	Goals	Objectives
1	Improve the effectiveness of the teaching-learning process and increase graduate employability.	Design new demand-based and marketable programs that increase students’ employability and global competencies.
		Open demand driven graduate programs
		Review current programs and curricula.
		Develop professional capacities of the academic staff.
		Attract industry professionals and visiting professors for graduate teaching and academic advising.
		Improve the information/digital literacy of staff, researchers and learners

		Expand learner-based tutorial programs and student services.
		Improve student admission and course management systems.
		Introduce digital pedagogy and platform.
		Provide evidence-based student academic progress to enhance retention and completion.
		Expand skills and practice-centered teaching and continuous assessment.
		Expand Library Collections that support the teaching learning
		Providing easy access to library resources and Services
		Creating a strong and furnished Career Service Centre
		Explore student career development planning
		Develop and run programs that increase undergraduate students' global competencies and enhancing employability and global competencies.
		Develop entrepreneurship soft skills
		Develop staff attraction and retention methods
		Proportionally increase investment in research.
		Increase and disseminate research output.
2	Build AAU's research capacity, produce scientific research and expand knowledge frontiers.	Strengthen research and publication reward systems.
		Explore indigenous knowledge and wisdom, and integrate it with conventional knowledge for solving societal problems.
		Develop capacity of centre of excellences and attract visiting research professors.
		Establish Research Methodological Center (RMC) under Research Office.
		Develop centralized (national) data repository, sharing and high-performance computational systems.
		Develop grant funding and graduate research fund management systems (strengthen CONVERIS and link to existing automation systems like IFMIS and ICMIS).
		Improve the number of reputable local journals.
		Initiate research seed-grant scheme.
		Strengthen the capacity of research institutes to integrate graduate studies.
		Transform AAU press to publishing University research works

		Expand and promote the Ethnographic Museum at IES, Natural History Museum and the National Herbarium at the College of Natural and Computational Sciences to working on the promotion of Multiculturalism, biodiversity management in AAU, Preserving Heritage, giving scholarly community engagement, generating income
3	Design research and innovation agenda that address society's most pressing challenges.	Update research priority areas that align with the national development agenda.
		Expand thematic and collaborative research projects
		Establish a research grant office and strong project management system.
		Undertake university-industry joint funded projects.
4	Provide transformative and scholarly community engagement.	Identify priority areas for scholarly and impactful community engagement program.
		Solicit financial sources to conduct community engagement/service.
		Improve the capacity of community engagement.
		Implement the rubrics for Institutionalizing University-Community Engagement Framework
		Expand scholarly community engagement programs.
5	Strengthen university-industry linkage, technology transfer and stakeholders' engagement	Strengthen university- industry linkage.
		Cultivate innovation culture and transfer of technology.
		Expand annual project, research, and job-fair exhibitions with employers.
		Make Tikur Anbessa Hospital a preferred medical tourism and health sciences education destination
		Reduce the impact of HIV/AIDS and other reproductive health issues in University students, and staff members
		Create alumni database and consolidate their involvement in supporting university initiatives.
6	Institutional autonomy, good governance, effective leadership and participation.	Secure institutional autonomy, Create a strong leadership and management system to ensure transparency and accountability
		Ensure academic freedom/autonomy.
		Enhance communication for sharing vision, mission, and core values among stakeholders and staff.
		Work towards image building.
		Mobilize and attract external funding.
		Establish performance management systems.
		Establish governance and financing systems that takes into consideration the unique nature of Tikur Anbessa Hospital.

		Enhance the engagement of university employees in university affairs.
		Restructure the institutional structure.
		Improve the efficiency and effectiveness of the internal processes (HR, finance, procurement, facility management, ...)
		Work towards internationalization of higher education
		Provide efficient and effective Budget and Finance Service
		Provide efficient procurement services
		Provide efficient procurement services
		Provide efficient and effective facility service
		Providing efficient property administration
		Providing efficient student service
7	Expand national and global partnerships, networking and collaboration.	Create collaborative platforms and run joint programs with national and international universities/institutions
		Increase and diversify international student and staff exchange programs
8	Contribute towards the realization of UN SDGs and AU Agenda 2063 in higher educations.	Help towards the realization of UN SDGs key target as regards higher educations
		Improve gender equality and inclusion; and create all-inclusive learning environment (irrespective of sex, age, race, colour, ethnicity, language, religion, political or other opinion, national or social origin, property or birth, as well as persons with disabilities, migrants, indigenous peoples, and children and youth, especially those in vulnerable situations or other status)
		Revitalize the causes of pan-Africanism and promoting key continental agendas through its involvement in the African Research University Alliance (ARUA).
9	Provide opportunities and resources to attract, recruit, develop and retain the highest calibre academic and administrative staff.	Improve overall staff qualification index.
		Provide opportunities and resources to attract, recruit, develop and retain the highest caliber academic and administrative staff.
		Advance good governance, effective leadership and democratization.
		Open and expand further education and scholarship opportunities for the staff.
		Create conducive working conditions and office environment for employees.
		Strengthened higher education training, leadership development centre and research

		Introduce succession and replacement plans.
		Revise the current recognition and reward system of the university.
		Develop and expand housing scheme for employees.
		Diversify staff incentive schemes.
		Reinstate AAU teacher licensing, relicensing, and continuous professional development programs.
		Improve the efficiency and effectiveness of HR
10	Invest in technology, physical infrastructure and institutional facilities.	Improve digital access to staff and students
		Expand ICT-supported teaching and student management systems
		Expand ICT supported research
		Develop and implement coherent and holistic ICT Governance systems and Control policies
		Expand and improve smart classrooms
		Implement social networking system
		Upgrade teaching, graduate laboratories and establish core labs
		Expanding Library Technologies to support the teaching learning and research activities of the university
		Establish additional centers of excellence in nationally strategic areas.
		Expand support for graduate students
		Expand ICT usage in admin domains
		Install electronic security systems
		Create conducive classrooms, lecture halls toilets
		Backup power supply and surge protectors
		Improve water supply
		Create conducive working environment, green and clean campuses
		Improvement in infrastructure to enhance teaching and learning
		Encourage and focus on sustainable university core income generating activities
		Establishment of AAU endowment fund, and securing financial resources

11	Put in place and implement procedures and standards to assure the quality of education, research and community engagement	Ensure the quality of programs of studies at all levels
		Maintain the quality of research and projects
		Maintain the quality of community engagement and technology transfer
		Maintain stakeholder satisfaction about the quality of education and services delivered.
		Undertake office capacity development for the newly established Quality Assurance office
12	Transform engineering and technology programs	Strengthen engineering and technology educational programs to support MEGA and quality infrastructures demanded nationally and in East Africa.
		Address the critical shortage of qualified academic staff for teaching and research
		Build infrastructure and resources for teaching and research to create conducive environment for research and excellence (Including Univer-City).
		Support the IoTs to develop enhanced partnerships modalities with industry, public organization and international donors for need-based researches, Technology and knowledge Transfer, and develop innovative products and Community engagement
		Revenue generation by involving in huge and quality infrastructure of private and public sector projects
		Establish a governance and financial system taking the special autonomy of the IoTs as per the Autonomy Directives and boost AAU's contribution to the engineering, technological, and urban development of national development

5.2.1. University Level Strategy

The basic University level strategy is that of growth strategy in the areas of teaching-learning with increasing focus on post graduate programs, internationalization of AAU by increasing foreign students and cross-border education, research, and community engagement.

The University and academic unit level strategies of AAU will be implemented in the coming five years with possible extension into the next five years described as follows.

5.2.2. Parenting Strategy

Parenting strategy deals with the relationship between the HQ of AAU and its Strategic business units (academic units) or/and business units as well as the relationships among SBUs/BU.

- ♦ **Vertical relationships:** The possible vertical parenting strategy is either standalone or evaluative. AAU uses standalone parenting strategy for those institutes and programs funded by donors. For others evaluative type of relationships will be established. In evaluative type of vertical relationship, all other organs under AAU will be given the maximum autonomy to execute their strategic plans. However, strong performance management systems will be established at AAU level. Based on performance management systems, the necessary intervention will be taken including training, replacement of managers and incentives for performance.
- ♦ **Horizontal relationships:** This is the relationship among and between the different organs in AAU. Horizontal relationships among the different SBUs/BUs will be encouraged. Special focus will be given for horizontal relationships in certain areas such as Black Lion Hospital and the different Schools and Departments under College of Health Sciences as well as other SBUs/BUs.

5.2.3. Academic Units Level Strategies

The academic level strategies deal with how the different colleges, institutes and schools in AAU can satisfy the specialized capabilities through service and product in their particular unit.

- ♦ For colleges/institutes focusing on *teaching-learning* process, the basic strategic focus is to produce employable graduates who are fit for the national, regional and global market labor force demands. These colleges/institutes shall consider the emerging demand in their respective contexts and disciplinary areas, local, national, regional and international dynamic needs.
- ♦ For colleges/institutes focusing on graduate-level research and innovation, the strategic focus is to conduct need-based and problem-solving research aligning with the priority areas of the nation, and produce innovative services and products (research outputs and technology) that are marketable.
- ♦ For health services (Black Lion Hospital), the best strategic focus will be providing effective health services to customers. Black Lion Hospital will also develop into non-communicable disease hub for the region.
- ♦ For community engagement, the strategic focus will be facilitating scholarly and mutually beneficial engagement with community.
- ♦ For research institutes and centers, the strategic focus will be operational excellence and attracting collaborative research grant for problem solving research outputs

5.2.4. Students Career Development Strategy

Addis Ababa University has formulated Students Career Development plan aimed at increasing the employability of graduates- consistent with the direction of MoSHE. A prudent strategy would be to realize an 80% and more than 80% employability of the University's graduate by the year 2025 by improving students' soft skills, entrepreneurial skills and career development through intensive trainings, career guidance, counseling, job fairs, career weeks and other related activities deemed relevant to enhance the employability of our graduates.

The Career Development Strategy will enable students to present and demonstrate their competency better, making themselves more attractive to employers and fill skill gaps on soft and entrepreneurial mind set up. They will also have more clarity on their career path and will be in the position to meet the knowledge, skills and attitude requirements of wage employment or self-employment. Thus, AAU will organize the services into a formal and legitimate work center.

- Soft skill Development Center: AAU shall design strategies to enhance student's soft skill development (arranging and inviting guests from industry and cooperative Stakeholders).
- Entrepreneurship Skill Development Center: AAU shall design strategies to enhance student's entrepreneurship skill development (arranging and inviting guests from industry and entrepreneurship centers Stakeholders).
- Employability through Job-fair Center: AAU shall enhance student's employability linking students with industries through job fair.

5.2.5. Shared Functional Strategies

The different units/colleges and academic units of the University will develop their own business strategies cascading from the University level grand strategic plan for effective utilization of resources. There are certain centralized resources at the university level such as ICT to be shared among the various academic units.

5.2.6. ICT Strategy

The available ICT services in AAU are limited to very basic web browsing, e-mail, Registrar System, Integrated Financial Management Information system (IFMIS), plagiarism test, e-learning, online entrance exam, research management, digital library, smart classrooms, CONVERIS and limited performance appraisal.

As a research university, AAU is expected to garner high amount of data and conduct computationally intensive research. Moreover, the COVID-19 pandemic is forcing AAU to rethink new modes of course delivery and running its routine businesses.

In the next five to ten years there will be a need to build and expand the ICT infrastructure and services in terms of their service quality, coverage, and capacity. AAU shall encourage online learning systems, install institutional email-based communication, design its ICT policies (e.g., for electronic communication and approval of soft transactions), harness open-source solutions and emerging technologies (like cloud computing), eventually move to a single point authentication, authorization and accounting system. Realizing the capital-intensive ICT investment, AAU shall craft mechanisms to utilize its staff and students to come-up with homegrown innovative solutions. For that the ICT units shall work hand-in-hand with the academic units.

5.2.7. HRM Strategy

In spite of progress registered in past years in the university's overall growth, there is a high level of staff disengagement including high level of absenteeism from class, failure to strictly observe academic calendars, poor advising and low morale for a number of internal and external reasons. The performance appraisal is not properly designed with little objective for development. Some members of the teaching staff have even full-time employment in other organizations.

As a very important phase in developing an effective human resource management strategy, AAU will conduct an assessment of its current staff by immediate academic units using potential-performance matrix and the result of the assessment will be confirmed by college/institute heads using the performance/potential grid indicated in Table 11.

Table 11. Performance/potential grid to be used by colleges and institutes.

Potential	High	Box 5 Seasoned professional capable of expanded role, but may be experiencing problems that require coaching and mentoring	Box 2 Does extremely well at current job with potential to do more; give stretch assignments to help prepare for next level	Box 1 Consistently performs well in a variety of assignments; superstar employee. Big picture thinker; problem solver; self-motivated.
		Box 8 With coaching could progress within level; focus on stretch goals for this employee	Box 6 May be considered for job enlargement at the same level, but may need coaching in several areas, including people management	Box 3 Current role may still provide opportunity for growth/development; focus should be on helping improve strategic thinking.
		Box 9 Consider reassignment, reclassification to a lower level or exit from AAU	Box 7 Effective performer, but may have reached career potential; try to coach employee on becoming more innovative, focus on lateral thinking	Box 4 Experienced high performer but has reached of career potential. Still a valuable employee and can be encouraged to develop communications and teaching/research skills
	Medium	Low	Medium	High
		Performance		
	Low			

Once the report is consolidated at the University level, a series of actions will be taken at individual level to enhance performance and competence through need-based training, career development, coaching and mentoring. Staff incentive schemes will be developed based on capacity and legal requirements.

5.2.8. Innovation Strategy

AAU uses open innovation strategy to assist the academic community, the business community and the public offices to improve their teaching-learning, research, services, processes, transfer and incubation.

5.2.9. Research Strategy

Academic units running graduate programs and research institutes find it challenging to conduct impactful research due to resource and other infrastructure constraints imposed by low government budget earmarked for research. The following strategies shall be executed to improve the limitations.

- Research capacity building strategy: The duty of unit is to train and update staff on common research tools including grant winning proposal writing, mobilize the academic staff to develop collaborative research on the research priority areas of University, raise awareness and capacity of academic and technical staff on research ethics, data analysis techniques, research management, reference management tools, and research and academic writing skills. The unit/center will mobilize talented professional trainers from around the world including the Ethiopian diaspora.
- Funding strategy: Research Grant Office will be established whose main duty would be acquiring international announcements /calls, disseminating calls to the AAU community using electronic outlets, coordinating proposals development, and support staff to apply. AAU will develop donor map showing potential will be approached with detailed proposals for funding to complement and support its efforts.
- Research laboratories and core labs: Research laboratories will be strengthened established to support graduate research running in each academic unit. Core labs will be established in selected areas to avoid duplication of equipment and create a system of effective and efficient use of resources and generating revenue by offering analysis services to national and regional research institutions.
- Project management strategy: One of the critical problems of AAU is low level of fund utilization, poor reporting to donors and unclear engagement of major stakeholders. AAU will enhance its financial settlement mechanisms. To this effect, AAU will establish a project management office with clear mandates.

- Social entrepreneurship research center: One of the most innovative approaches for solving social problems using business approach is the development of social entrepreneurs. To assist donors and social entrepreneurs in Ethiopia, AAU will establish research center for social entrepreneurship.
- AI Research Centre: One of the critical elements in the fourth Industrial Revolution (IR) is Artificial Intelligence. To assist Ethiopia to be part of the fourth IR, AAU will establish AI Research Centre by coordinating relevant academic units. As AI is applied in diverse fields, the AI Research Centre will serve all academic units in AAU. Its team members must be mobilized from various academic units. The AI Research Centre, among others, shall be engaged in organizing relevant data from multiple domains, identify and build capacity in computational hardware and platforms, develop relevant rules and policies, build staff and student capacity, solicit funders and partners, and coordinate high impact AI researches.

5.2.10. Financial Management Strategy

One of the problematic areas of the financial system in AAU is the unfriendly accounting process for research projects. In order to mitigate such a chronic problem and bring about efficient financial system, AAU will identify the major policy constraints and seek for appropriate research-based solutions for each constraint.

5.2.11. Procurement Strategy

One of the basic problems in AAU and in Ethiopia is the inefficiency of procurement processes. The capacity is extremely low and it is not responsive to the needs of the different academic units. Therefore, the following interventions will be made to improve procurement.

- Decentralization of procurement except major purchasing: One of the most serious problems in AAU is the inefficiency of procurement. Given the huge size of AAU, centralized procurement is unrealistic. AAU will need to decentralize its procurement system. The researcher must be allowed to purchase up to ETB 100,000 following government procurement procedures. For technical procurement, AAU can outsource its procurement tasks. Capacity building may also contribute for effective purchasing.
- Sourcing strategy: AAU may also develop a sourcing strategy by assisting and capacitating the potential suppliers by focusing on critical and important inputs.

5.2.12. Community Engagement Strategy

5.2.12.1. Community Engagement

Community engagement, which comprises reciprocal scholarly activities designed to impart growth and development both for AAU and community partners, is a core mission of AAU and hence the responsibility of all academic units. AAU has issued a guideline for community engagement in 2019 to emphasize its importance and its vital role of AAU in advancing the public good and maintain its collaboration with communities across the city, region, country and world.

AAU will therefore: -

- put the necessary governance structure in place to ensure a sustained Community
- Engagement by the various academic units of the University; cultivate a culture of community engagement among university staff and student body;
- encourage academic units to identify priority areas and specific activities commensurate to their specific professional competence for community engagement;
- support academic units to assess core community needs and design, implement, monitor and evaluate projects that engage and serve the community;
- build a strong partnership that benefits both the university and the community;
- Ensure the availability, proper allocation and efficient utilization of resources necessary for effective Community Engagement.

5.2.12.2. Scholarly community engagement

AAU has an excellent standing to furnish scholarly community engagement both to internal and external community.

The internal and external community may include but not limited to: -

- **Women leadership development:** There is a national effort for gender balance in public offices. AAU, as part of its commitment for gender equality and equity, will work to improve the competence of women to assume their deserving position in the community and effectively execute their responsibility in all spheres. AAU will establish a leadership development center to assist the government effort to effectively deal with gender issues.
- **Consultancy:** All types of consultancy services in all areas of its expertise including management, engineering, legal, environment, health, etc. Due to lack of

competent local workforce, the huge nationwide investments are now designed and constructed by foreign companies. AAU should contribute to reducing this involvement by reorienting itself to handle high-end/high-tech tasks and collecting its share from the huge investments.

- **Commissioned research:** Sometimes, there may be big surveys and research projects beyond the capacity of individual employees and teams. AAU will be engaged in commissioned research without crowding competition with small consultants.
- **Database:** AAU will start to maintain critical national data that may be required by researchers, consultants, investors, small business operators and development partners in certain nationally critical areas.

5.2.13. Communication Strategy

AAU has obtrusive weakness in communication practices both with the internal and external stakeholders. Given the huge size of AAU, it had been difficult to swiftly communicate relevant information to staff students. Another serious problem is that AAU's staff appear on mass media such as television programs to participate in interviews, discussions and provide public speeches in areas outside of their specialization and expertise raising credibility issues to the university. Television and other media interviews need to be regulated. It may also develop database of its experts and provide the same to the media consumption for possible interviews and professional analysis. AAU will standardize its communication with stakeholders in the following manner :

- **Email communications:** email communications shall be standardized and supported by policies. Some considerations while drafting the policies may include that all formal email communications shall be done using the University's account. To keep the institutional memory, all appointees must use formal email address opened in the name of their unit, and shall handover the account upon completing their terms. All staff and students will have email accounts with predefined hierarchy to broadcast and multicast emails.
- **Professional dialogue:** AAU shall design strategies to enhance professional dialogue (arranging for academic presentations and ethical and moral dialogues).
- **Art:** AAU shall utilize art to publicize its works and create a leisure activity for its staff.
- **Blogging:** There must be a social media platform for University staff and students for writing certain articles subject to editorial processes and authorization. This opportunity may reduce the unregulated activism and

engagement among university staff.

- **TV:** AAU will have its own TV programs where major trends and ideas will be discussed based on expertise.
- **Webinar on innovation and issues in trend:** periodic discussions on innovation or major trends may be organized by AAU.
- **Branding strategy:** AAU will invest in branding strategy with clear strategy and documented plan.
- **Website** – The external communication office will review the AAU website periodically to communicate the news and views of public interest and increase its visibility
- Effectively utilize the **museum** at the Ethnographic Museum at Institute of Ethiopian Studies and Natural History Museum and the National Herbarium at the College of Natural and Computational Sciences as showcase of the unique capacities of AAU and promote the importance of the rich museums for national identity and protecting biodiversity.

5.2.14. Quality Management and Assurance Strategy

As long as an organization sets its strategic plan for its corporate objectives and functions, it also needs to introduce a strategic quality planning in order for the corporate goals to be effectively realized. Even though Addis Ababa University has always had its strategic plan, those strategic plans have never been interfaced with effective quality strategic planning. AAU, will therefore, put in place viable quality management and assurance plans that align with and support the realization of those corporate strategies and goals mapped out in this strategic plan.

As a fundamental pathway, AAU's quality assurance strategy underlines strict compliance with at least the minimum standards and principles set by the Ethiopian Higher Education Quality Assurance and Relevance Agency (HERQAA) nationally and by the Bologna Process and Standards and Guidelines for Quality Assurance in the European Higher Education Area (SGQAEHEA) internationally in order to achieve high quality in teaching and scientific work. Addis Ababa University will strive to gradually pass through rigorous steps of cyclic accreditations (national and international and by all modes of accreditation and accreditors) in order to keep abreast with time in terms of the high quality of its educational programs and services and thereby maximize its capabilities of being an internationally competitive and vibrant research university.

AAU will also follow both internal and external quality assurance mechanisms. The internal quality assurance in turn will focus, guiding and controlling members of the university community and the operation systems to strictly comply with the standards, regulations, legislations and operational and performance frameworks of the university while also continuously empowering the university community to develop a culture of quality. Delivering high quality products and services is not a choice but a survival issue to outcompete and satisfy the dynamic needs and aspiration of customers and stakeholders and exert high impact on the overall societal development of the country and beyond. In addition to the quality assurance mechanisms, effective internal quality enhancement initiatives and activities will be put in place by the different academic and research units of the university.

- In its efforts to assure quality, Addis Ababa University will strictly observe the following international standards in order to secure international accreditation and maintain strong internal quality assurance and enhancement system.
- Approval, monitoring and periodic review of programs and awards: AAU will continuously develop and improve formal mechanisms for the approval, periodic review, and monitoring of its programs and awards.
- Assessment of students: AAU's students will be assessed using published criteria, regulations, and procedures which are consistently applied.
- Quality assurance of teaching staff and continuous professional development: AAU will develop a system to make sure that members of the teaching staff are qualified and competent to teach.
- Learning resources and student support: AAU will ensure that the resources available for the support of student learning are adequate, appropriate, and technologically up-to-date for each program offered.
- Information systems: AAU will ensure that relevant information is collected and analyzed for effective quality management of its academic programs

Public information: AAU will regularly publish up-to-date, impartial and objective information about the programs and awards it offers in order to meet the standards of accountability to public quality demands.

5.2.15. Stakeholder Engagement Strategy

Table 12 provides the goals and/or interests of each stakeholder/customer and corresponding strategies to realize them.

Table 12. Stakeholder Engagement Strategy

S. No	Stakeholder/customer		Goal/interest	Strategies
1	Federal government		Strengthening the university in all its mission areas	Allocating adequate budget and creating peaceful working environment
2	Ministry of Science and Higher Education/Ministry of Education		Working collaboratively with the university	Providing appropriate policy guidance and helping to create international networks
3	Ministry of Health		Working collaboratively with the College of Health Sciences of the university	Proving financial support as well as knowledge and skill sharing
4	City Administration of Addis Ababa		Facilitating the university's effort to work with the local community and supporting the university as the need arises	Serving as a linkage between the university and the local community; working to solve staff housing-related problems
5	University leadership		Enhancing the overall excellence and creating a conducive working environment	Providing timely and fair leadership
6	University staff	Academic staff	Working towards ensuring quality in the all mission areas	Professionally developing and offering high quality teaching and transformative community engagement; and conducting problem-solving research
		Administrative staff	Proving/working skilfully with the leadership and academic staff	Developing administrative knowledge, skill, and integrity
7	Students		Acquiring saleable knowledge, skill, and attitude	Working hard in every discipline
8	Employers /businesses and industries/		Collaboratively working with university to enhance graduate employability	Creating appropriate environment for internship programs
9	Public		Working collaboratively with university	Creating relevant linkage as appropriate
10	Local community		Working collaboratively with university	Creating relevant linkage as appropriate and identifying possible areas of support from the university
11	Higher education institutions		Working collaboratively with university and benefiting from the huge experience of the university	Sharing human and material resources

S. No	Stakeholder/customer	Goal/interest	Strategies
12	International community	Working collaboratively with university	Creating networks and sharing knowledge and skills
13	Donors and alumni	Working collaboratively with university and improving the university's status	Supporting the university financially and creating partnerships
14	Alumni	Working collaboratively with AAU alumni for resource mobilization, networking and image building	Create an alumni database for multiple alumni associations per academic unit or year of graduation.

6. Strategy Implementation

6.1. Strategy Intervention

The leadership of AAU is expected to employ holistic approach in the execution of the strategy since partial treatment will produce limited success and may not lead the university to excellence. Hence, the leadership will give due attention to the following seven areas of intervention(7S's). Table 13 provides the strategic intervention areas of the leadership of AAU.

Table 13. Strategic intervention areas of the leadership of AAU.

S. No	Intervention Areas	Descriptions	Current situation in AAU	Possible actions
1.	Shared values (central variable)	The guiding cherished principles that direct the AAU's behavior at all levels.	They are either not communicated or accepted by staff. They are not shared among staff.	Formulate communication strategy so that shared vision, mission, goals, and values become guiding principles in AAU at all levels of decision making.
2.	Style	AAU's culture, usually described as 'the way things are done around here' such as centralization and decentralization	AAU uses relatively centralized decision making in support areas.	Shift towards more of decentralization and empowerment.
3.	Staff	The people in the University, their talents and the way they are developed.	There is no adequate information about staff potential and performance.	Formulate and implement talent management strategy in AAU. Differentiate staff based on potential-performance matrix.

S. No	Intervention Areas	Descriptions	Current situation in AAU	Possible actions
4.	Skills	The competencies and capabilities of the University and its people.	There is no solid information but poor English language and research competences of staff. Little investment in computer and leadership skills development of staff.	Conduct training needs assessment and formulate skills upgrading strategy at all levels by establishing Training and Development Center.
5.	Structure	The way in which AAU's activities are managed.	AAU dominantly uses functional structure in the support wing. This is not appropriate for big organizations such as AAU.	Change the structure to Divisional Structure with strong performance management systems at HQ and the different organs.
6.	Strategy	The defined plan AAU has to achieve its objectives.	Poor execution of strategies. There is no strategic focus.	Assign competent managers and leaders to key positions with full empowerment and resources for improving execution.
7.	Systems	All the systems that direct AAU's activity	Weak internal processes in many areas such as HRM, Finance, Procurement, Information systems, Project Management.	Start process mapping and improvement aiming at improving internal processes using benchmarking Establish process council for decision making related to process.

6.2. Action Plan

An action plan is a plan that contains enough detail to achieve an objective or goal. This typically includes an outline of goals, objectives, measurements, action steps and responsibilities for each step. The action plan for the strategic plan of AAU for the first five years of the strategic plan with the implication of extending it to 2030 is outlined in Table 14.

Table 14. Action Plan

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
Strategic Goal 1. Improve the effectiveness of the teaching-learning process and increase graduate employability											
Design new demand-based and market-able programs that increase students' employability and global competencies.	Conduct needs assessment and develop new programs	Number	New Regular programs opened (MSc/M. A)	AVP	216	4	4	5	5	5	15
		Number	New Extension programs opened (MSc/M. A)	AVP	54	-	1	1	1	1	10
		Number	New Distance Education programs opened (MSc/M. A)	AVP	11	-	1	2	2	1	5
	Open demand driven graduate programs	Develop and run an online graduate program	Number	New Regular programs opened (PhD)	AVP	98	3	3	3	3	3
Number			Online programs run	AVP	1	0	1	1	1	1	15
Review current programs and curricula.	Assess and validate the appropriateness of proposed programs	Number	Programs opened	AVP	2		1		1	1	5
	Form program review committees	Number	Reviewed programs	AVP	N/A	5	8	12	12	12	20

Provide evidence-based student academic progress to enhance retention and completion.	Organize and analyze data on retention	Ratio	Retention rate (overall and per program)	AVP	NA	1	1	1	1	1	5
	Organize and analyze data on completion	Ratio	Completion rate (overall and per program)	AVP	NA	1	1	1	1	1	5
			Completion rate (gender)	AVP	NA	1	1	1	1	1	5
	Encourage and facilitate research-based support for students with disabilities	Number	Research report and support strategy material developed	AVP	0	1	1	1	1	1	5

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Develop inclusion policy for students with disabilities and survey its implementation	Number	Inclusion policy document and survey report,	AVP	0	1	1	1	1	1	5
Expand skills and practice-centered teaching and continuous assessment	Revisit modules for skills-centeredness	Percentage	Modules in different programs	AVP	NA	10	30	60	80	100	200
	Implement practicum/internship programs	Percentage	Practicum/Internship programs	AVP	50	60	60	70	70	70	100
	Implement continuous assessment in all college curricula	Percentage	Modules within a program	AVP	70	80	90	100	100	100	100
	Digitize E-books, local journals, dissertations and thesis	Number	E-books, Journals, theses digitized	AVP	230,004	14,000	14,000	14,000	14,000	14,000	100.0000
Expand Library Collections that support the teaching learning	Subscribe E-books	Number	List of books and journals subscribed	AVP	0	3000	4000	5000	7000	7000	1500
	Collect Multimedia resources	Number	Resources collected	AVP	1000	3000	4000	5000	5000	5000	15000
	Subscribe e-journals	Number	Journal titles subscribed	AVP	3500	4000	4000	4000	4000	4000	8000
	Increase open access Journals	Number	Accessible Open journals	AVP	20,000	8000	8000	8000	8000	8000	200000
	Increase Raw Research Data	Number	Datasets increased	AVP	0	2000	3000	3000	4000	4000	150000

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Provide easy access to library resources and Services	Conduct user education about the library resources and services	Number	Staff and student trained	AVP	4000	2000	2000	2000	2000	2000	5000
	Catalogue and classify the existing library resources	Number	Books classified and catalogued	AVP	170,000	5000	5000	6000	6000	8000	20000
	Conduct training on research intelligence software and Plagiarism detection software	Number	Staff and student trained	AVP	1200	100	100	100	100	100	1700
	Conduct training on Reference Management software, Data management tools, Journal indexing software	Number	Staff and student trained	AVP	50	100	200	200	150	100	800
	Provide dedicate spaces for Collaborative Research	Number	Spaces provided	AVP, Library	70	5	10	10	15	10	25
Create a strong and furnished Career Service Center	Equip the library with computers and laptops	Number	Computers and laptops set	Library	250	100	120	120	120	120	500
	Organize and staffing the career office for career persons	Number	Office facilities and availability of professional career staff	AVP	15	2	3	3	2	2	10

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Explore student career development planning	Assist undergraduate students with all aspects of career development and planning.	Number	Graduate students assisted	AVP	1500	1000	1100	1800	2000	2500	5000
Develop and run programs that increase undergraduates' global competencies and enhance employability	Conduct needs assessment and develop soft skills training materials	Number	Materials developed	AVP	1	2	3	3	4	4	15
	Introduce entrance exam for all undergraduate student admission	Number	Selecting best students for all undergraduate programs	AVP		1	1	1	1	1	5
	Develop effective job search strategies for competitiveness and employment	Number	Strategies developed	AVP		1	1	1	1	1	5
	Provide extra-curricular training on soft skills	Number	Trainings offered	AVP	0	4	5	6	6	7	10
		Number	Students trained	AVP	0	3000	3500	4000	4000	4500	10000
	Provide Career Counseling and assessment for all undergraduate students	Number	Students counseled and assessed	AVP	0	50	100	125	150	175	500
		Number	Students trained and supported	AVP	0	10	13	15	20	25	120

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Develop entrepreneurship soft skills	Assess students need, interests and skill gaps	Number	Assessments conducted	AVP	0	2	2	2	2	2	5
	Select highly qualified trainers	Number	Trainers selected	AVP	0	3	3	4	4	4	20
	Prepare training materials	Number	Training materials prepared	AVP	1	2	3	3	4	4	25
	Provide training to undergraduate students	Number	Students trained	AVP	0	200	300	400	500	550	2500
	Increase student participation in extra and co-curricular activities	number	Student union strengthen, sport, and other clubs expanded	VPASS	1	3	3	5	5	10	20
Develop industries and employer attraction and retention methods	Organize career week, expo and job fairs	Number	Organized events	AVP	0	25	28	32	40	45	100
	Offer tailored services to employers including advertising and promotion of vacancies on and off campus recruitments and selections and advising	Number	Tailored services offered	AVP	0	5	3	4	5	6	20
	Prepare awareness creation environment with employers regarding career development service and benefits	Number	Awareness creation sessions conducted	AVP	1	1	1	1	1	1	5

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Sign MoUs with collaborative organizations	Number	MOUs Signed	AVP	3	3	3	4	4	5	15
	Create employment opportunities to students	Percentage	Graduates employed	AVP	60	70	75	80	83	85	90
	Carry out a tracer study	Number	Study Report	AVP	1	1	1	1	1	1	5
Strategic Goal 2. Build AAU's research capacity, produce scientific research and expand knowledge frontiers.											
Proportionally increase investment in research	Increase the annual research budget.	Ratio	Size of budget allocated	VPRTT	64 M	120 M	200 M	250 M	300 M	350 M	700 M
Increase and disseminate research output	Increase the number of research publications in reputable journals and conference proceedings.	Number	Researches articles published	VPRTT	1600	2200	3000	3500	4000	4500	10000
	Organize national and international seminars, conferences, and workshops to disseminate findings.	Number	Dissemination workshops/seminars organized	VPRTT	10	30	50	60	60	70	1000
Strengthen research and publication reward systems	Strengthen publication incentive	Number	Publication	VPRTT	1600	2200	3000	3500	4000	4500	10000
	Award researchers who published in reputable journals.	Number	Awards made	VPRTT	0	3	5	5	5	7	10000

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Explore indigenous knowledge and wisdom, and integrate it with conventional knowledge for solving societal problems	Award researchers who generate grants	Number	Awards made	VPRTT	0	5	5	7	7	7	20
	Award women researchers	Number	Awards made	VPRTT	0	2	3	5	5	5	20
	Identify indigenous knowledge practitioners.	Number	Applications of Indigenous knowledge to solve practical problems	VPRTT	0	1	2	3	5	5	15
	Link with appropriate AAU researchers.	Number	Links formed	VPRTT	0	1	2	3	5	5	30
Attract visiting research professors	Facilitate affiliation request from college/department	Number	Professors visited	VPRTT	10	15	20	25	30	35	10020
	Revise affiliation fee rate	Amount	Revised fee rate	VPRTT	\$300	\$300	\$300	\$500	\$500	\$500	\$500
	Provide office and create enabling environment	Number	Offices reserved for professors	VPRTT	10	15	20	25	30	35	10020
	Provide accommodation	Number	Accommodations reserved for professors	VPRTT	10	15	20	25	30	35	10020

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Establish Research Methodological Center (RMC) under Research Office	Establish RMC and coordinator recruitment	Number	Centers established	VPRTT	0	-	1	-	-	-	
	Provide trainings based on demand (Proposal writing; Research Ethics; Soft skills (statistics, reference management))	Number	Trained staff	VPRTT	60	800	800	60	60	60	500
Develop centralized (national) data repository, sharing and high-performance computational systems	Prepare database at center and college levels	Number	Database centers established	VPRTT VPID	0	2	2	3	4	4	5
	Standardize data collection formats	Number	Formats standardized	VPRTT	0	1	1	1	1	1	1
	Acquire high performance computing (HPC)	Number	HPCs obtained	VPRTT VPID	0	-	1	-	-	-	3
Develop grant funding and graduate research fund management systems (strengthen CONVERIS and link to existing automation systems like IFMIS and ICMIS)	Prepare policy	Number	Set policy for funding scheme	VPRTT	0	-	1	-	-	-	1
	Conduct donor mapping	Number	Donor map prepared	VPRTT	0	-	1	-	-	-	1
	Open call and provide grant	Number	Grants provided	VPRTT	0	0	3	5	5	5	25

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Improve number of reputable local journals	Provide technical and financial support for existing journals	Number	Accredited and reputable local journals	VPRTT	18	18	20	20	21	22	40
	Evaluate existing journals	Number	Assessment/year	VPRTT	18	1	1	1	1	1	5
	Encourage launching of new journals	Number	New journals launched	VPRTT	18	2	2	2	2	2	10
	Encourage local journals to be indexed in international database (e.g., Scopus)	Number	Journals registered	VPRTT	3	2	2	2	2	2	20
Initiate re-search seed-grant scheme	Open a call, review, and award	Number	Grants reviewed and awarded	VPRTT	0	10	20	20	20	20	40
Strengthen the capacity of research institutes to integrate graduate studies	Review research staff promotion scheme	Number	Promotion guideline reviewed	VPRTT	0	0	1	0	0	0	1
	Provide resources for research	Number	Resources provided (in million Birr)	VPRTT	0	11	20	20	20	20	100
	Integrate graduate programs in research institutes	Number	Programs started	Institutes	7	1	1	2	2	2	10

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Upgrade teaching, graduate labs and establish core labs	Take an inventory of existing labs	Number	Inventory carried out.	AVP and VPRT	0	1	-	-	-		5
	Upgrade teaching and diagnostic laboratories.	Number	Facilities upgraded and their level of upgrading.	AVP and VPRT	0	-	1	1	-		5
	Upgrade and establish PhD research labs	Number	Labs upgraded	AVP/VPRT	5	5	5	5	5	5	25
	Establish core labs	Number	Labs established	VPRT	0	-	-	1	1	1	5
Transform AAU press to publishing University research works	Publish university research works	Number	Published re-search outcomes	AAU Press	2	5	5	5	5	5	5
Strategic Goal 3. Design research and innovation agenda that address society's most pressing challenges.											
Update re-search priority areas that align with the national development agenda	Review research policy	Number	Updated policy	VPRTT	1	1					1
	Update research priority areas	Number	Updated priority areas	VPRTT	1	1					1
	Review research manual	Number	Updated manual	VPRTT	1		1				1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Expand thematic and collaborative research projects	Increase the capacity of AAU to attract international research grants.	Number	Commissioned researches attracted/requested	VPRTT	1	10	10	10	10	10	50
	Open a call, review, and award	Number	Thematic research projects reviewed and awarded	VPRTT	46	50	60	70	70	70	500
Establish a research grant office and strong project management system	Customize research management platform	Number	Platform customized	VPRTT	0		1	-	-	-	5
	Open a research grant office with Terms of Reference (TOR)	Number	Research grant office established	VPRTT	0		1	-	-	-	-
	Provide sustainable logistics services through rental to research projects	Number	Vehicles made available	VPRTT	0	5	5	10	10	10	20
Undertake university-industry joint funded projects	Identify research topics for joint funded project and link to AAU staff	Number	Jointly-funded projects	VPRTT	0	1	3	5	5	5	15
	Select ideas for incubation	Number	Incubation ideas chosen	VPRTT	0	1	2	4	5	5	10

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Strategic Goal 4. Provide transformative and scholarly community engagement											
Identify priority areas for scholarly and impactful community engagement program	Identify community engagement priority areas	Number	Priorities identified	VPRTT	4	8	10	12	14	15	60
	Support community engagement proposals	Number	Community engagement proposals supported	VPRTT	8	16	20	24	26	30	100
	Start satellite community projects	Number	Active satellite community projects run	VPRTT	1	3	4	5	7	10	30
	Initiate community engagement centers	Number	Active community engagement centers available	VPRTT	0	1	4	6	8	10	20
Solicit financial sources to provide community engagement	Identify financial sources	Number	Financial sources identified	VPRTT	0	3	4	6	8	10	10
	Prepare grant proposals	Number	Grant proposals prepared	VPRTT	0	4	6	10	12	15	50
Improve the capacity of community engagement providers	Size of collected grants	%	Size of collected grant (in ETB)	VPRTT	0	3	6	9	12	15	25
	Prepare capacity building training for external stakeholders	Number	Community engagement providers (External) trained	VPRTT	0	100	200	300	400	500	1000
	Prepare capacity building training for AAU staff	Number	Community engagement providers (AAU) trained	VPRTT	0	1000	2000	3000	4000	5000	5000

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Introduce new community engagement proposals	Number	New programs introduced	VPRTT	0	3	4	5	6	10	10
	Identify staff who will provide free service	Number	Staff who provided free community engagements	VPRTT	150	200	250	300	400	450	1000
	Identify students	Number	Students who provided free community engagements	VPRTT	750	1000	2000	3000	4000	5000	1000
	Promoting field attachment (service learning)	Number	Students who provided free community engagements	VPRTT	750	1000	2000	3000	4000	5000	1000
Implement the rubrics for Institutionalizing University-Community Engagement Framework	Prepare rubric document	Percentage	Copies of the rubric printed	VPRTT	0	75	1000	-	-	100	100
	Train academic staff on the document	Number	Academic staff trained	VPRTT	0	1400	400	200	2600	3000	5000
	Recognize the academic staff	Number	Academic staff received credit	VPRTT	0	140	180	200	260	300	500
	Reorient the existing non-professional community engagement	Percentage	Staffs reported to engage in professional community services.	VPRTT	0	20	40	60	80	100	100
Expand scholarly community engagement programs	Revitalize innovative community engagement taskforce.	Number	Task force established	VPRTT	0	1	-	-	-	-	1
	Tap research outputs deliverable to the community	Number	Research outputs delivered	VPRTT	10	15	20	25	30	35	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Establish Creative Team	Percentage	Audiences for AAU owned satellite television Media	VPRTT	25	90	95	100	100	100	300
	Establishing & Form Production and Post-Productive facilities	Number	Facilities established	VPRTT	0		1	-	-	-	1
	Distribution of Production	Number	Products distributed	VPRTT	0	50	50	50	50	50	200
	Boost Project based community engagement.	Number	Services improved	VPRTT	1	4	6	8	9	10	20
	Support satellite community services through 'Urban Agriculture'	Number	Satellite community services offered	VPRTT	0	10	20	30	40	50	100
	Strategic Goal 5. Strengthen university-industry linkage and stakeholders' engagement and management.										
Strengthen university-industry linkage	Establish AAU-Industry Forum and maintain the linkage with the industry	Number	Links established and maintained	VPRTT	1	20	20	20	20	20	50
	Organize university-industry linkage database to provide evidence-based response	Percentage	Functionality, coverage, and timelines of the database	VPRTT	0	10	20	20	20	20	50

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Conduct industry-sponsored and/or joint adaptive researches	Number	Industry-sponsored and jointly conducted adaptive researches	VPRTT	0	4	6	8	10	12	50
	Facilitate training and consulting services redirected to the needs of the industry	Number	Consultancies and trainings provided	VPRTT	0	4	8	12	16	20	40
	Run industry-tailored programs/curricula	Number	Industry-tailored programs run	VPRTT	0	5	10	15	20	20	30
	Administer and expand internship, externship, and practicum programs across disciplines	Number of programs linked	students, academic staff, & industry staff exchanged	VPRTT	2215	2250	2750	3000	3250	50	15000
	Support colleges and institutes for strong university-industry linkage and technology transfer	Number	Joint meetings held with associate deans for Research and Technology Transfer	VPRTT	0	4	4	4	4	4	15
Cultivate innovation culture and transfer of technology	Conduct innovation workshops through strengthening innovation hubs	Number	Innovation workshops/meetings conducted	VPRTT	0	4	4	4	4	4	15
	Organize competition among students/young Ethiopian innovators	Number	Innovators awarded	VPRTT	0	3	3	3	3	3	12

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Administer periodic innovation competitions to increase technology innovation incubations and transfer	Number	Innovations admitted to the TBICs	VPRTT	0	20	25	30	35	35	120
	Facilitate the provision of patent right and licensing service	Number	Patent rights registered	VPRTT	0	4	5	5	6	8	10
	Commercialize successful start-ups from incubation centers	Number	Start-ups commercialized	VPRTT	0	3	5	6	8	10	12
	Increase the level of investment for innovation and technology transfer	Percentage	Annual budget assigned to UILTT activities	VPRTT	0	10	15	20	30	50	70
	Organize national and international seminars and workshops to strengthen collaboration for UILTT	Number	Innovation workshops conducted	VPRTT	0	1	1	1	1	1	5
Expand annual project, research, and job-fair exhibitions with employers	Organize project exhibitions	Number	Project exhibitions	VPRTT	2	2	2	2	2	2	12
	Organize research exhibitions	Number	Research exhibitions	VPRTT	1	1	1	1	1	1	5
	Organize job-fair exhibitions	Number	Job-fair exhibitions	VPRTT	1	2	2	2	2	2	10

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Make TikurAnbessa Hospital a preferred medical tourism and health sciences education destination	Invest in diagnostic and therapeutic medical equipment.	Number	Equipped facilities	AVP	55	189	61	41	40	28	160
	Train staff in specialty and subspecialty.	Number	Staff trained	AVP		50	10	10	10	10	20
	Increase enrollment of foreign students in postgraduate trainings.	Number	Students enrolled	AVP		50	10	10	10	10	100
	Solicit for funds to build specialty hospitals at the expansion land acquired.	Number	Secured fund	AVP	0	5	1	1	1	1	5
	Strengthen existing partnerships and forge new ones with local and international partners.	Number	Partnerships established	AVP	30	10	10	10	10	10	100
	Diversify and increase revenue sources	Number	Secured fund	AVP	0	3	3	3	3	3	15

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Reduce the impact of HIV/AIDS and other reproductive health issues in University students, and staff members	Increase awareness about HIV/AIDS and reproductive health issues among AAU leaders, students and staff.	Number	Orientation of new students	President		4	4	4	4	4	16
		Number	Educational material distributed	President		2	2	2	2	2	10
	Support and strengthen planning and implementation of HIV/AIDS and reproductive health issue interventions at all Colleges and Institutes.	Number	Trainings offered	President		2	2	2	2	2	10
	Support improved access to HIV/AIDS and reproductive health care services.	Number	Condoms distributed	President		12	12	12	12	12	50
		Number	Testing of HIV/STIs, treatment	President		2	2	2	2	2	13
Create alumni database and consolidate their involvement in supporting university initiatives	Create database	Percentage	Alumni registered	VPASS	0	10	30	50	50	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
Strategic Goal 6. Advance good governance, effective leadership and participation.											
Create a strong leadership and management system to ensure transparency and accountability	Submit and Secure University autonomy charter	Number	Government granted full institutional autonomy to AAU	president		1	1				
		Number	Policies, procedures, structure, placements designed and implemented	president			1	1	1		
	Provide relevant training to Board members	Number	Improved strategic decision making	President	0	5	5	5	5	5	5
	Provide relevant training to senior leadership	Number	Improved strategic decision making	President	0	4	4	4	4	4	4
	Introduce Executive Management performance appraisal	Number	Number of evaluations per year	President	1	1	2	2	2	2	4
Ensure academic freedom	Promote professionalism among staff	Percentage	Staff engaged	President	N/A	20	20	20	20	20	100
	Develop staff code of ethics	Number	Code of ethics guideline	President	1	-	-	1	-	-	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Enhance communication for shared vision, mission, and core values among stakeholders and staff	Use different channels for shared mission and values among staff	Number	Channels used to create shared vision, mission and values	President	1	1	1	1	1	1	1
Work towards image building	Formulate branding strategy	Number	Strategy developed	President	0	1	-	-	-	1	1
Expand and promote Museums	Restructure Ethnographic Museum at IES, Natural History Museum and the National Herbarium at the College of Natural and Computational Sciences	Number	Policy developed to expand and promote	VPRTT	0	1	-	-	-	-	1
Mobilize and attract external funding	Develop donor map	Number	Donors Identified	President	0	0	1	-	-	1	1
	Funnel donors	Number	Major donors identified	President	0	1	-	1	-	1	1
	Approach donors with solid proposal	Number	Proposals accepted	President	1	-	1	-	1	-	1
Establish performance management systems	Revise plan to evaluate performance	Number	Plans revised	President	1	1	-	1	-	1	1
	Measure staff performance	Number	Appropriate actions taken	President	1	1	1	1	1	1	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Evaluate performance for senior management, directors and deans	Number	Senior management, directors and deans evaluated	President	1	1	1	1	1	1	
	Publish AAU annual abstract of facts	number	Up to date and reliable data about AAU will be available for decision makers and other stakeholders	Strategic plan office	0	1	1	1	1	1	1
Establish governance and financing systems that takes into consideration the unique nature of TikurAnbesa Hospital	Establish private corridor service	Number	Patients served	VPRT	-	-	1	-	-	-	-
	Initiate change management	Number	Tools implemented	VPRT	-	1	-	-	-	-	1
	Develop process mapping	Number	Processes improved	VPRT	-	1	1	1	1	1	5
	Establish suggestion systems	Number	Suggestion boxes available	President	0	1	1	1	1	1	1
Enhance the engagement of university employees in university affairs	Establish grievance handling process	Number	Grievances handled	President	100	100	50	40	30	20	10
	Establish open door policy	Number of visitors per week	Visitors to Executive Management	President	50	50	50	50	50	50	50
Restructure the institutional structure	Change functional structure to divisional structure	Number	Structures revised	President	0	1				1	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Improve the efficiency and effectiveness of the internal processes (HR, finance, procurement, facility management)	Establish process council	Number	Process councils established	VPASS	0	1	-	-	-	-	1
	Implement root cause analysis	Number	Projects investigated	VPASS	0	1	1	1	1	1	5
	Automate processes where possible	Number	Processes automated	VPASS	0	1	1	1	1	1	5
	Outsource where possible	Number	Activities outsourced	VPASS	2	1	1	1	1	1	5
Work towards internationalization of higher education	Participate Internationalization of Higher Education forum by MoSHE	Number	Meetings participated	President	3	2	2	2	2	2	5
	Network with international offices for higher education	Number	Contacts created	President office	0	2	4	6	8	10	20
	Attract international student exchange	Number	Students enrolled	President office	100	100	200	250	250	250	500
Provide efficient and effective Budget and Finance Service	Pay employees' wages between days 26-30 every month.	Time	Salary paid	VPASS	5 days	5	5	5	5	5	Real time
	Submit financial monthly report.	Time	Report	VPASS	15 days	10	5	5	2	1	Real time
	Provide payment within 5 days as requested from procurement directorate.	Time	Payment to suppliers	VPASS	10 days	10	5	5	5	5	Real time

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Provide efficient procurement services	Implement program budget system.	Time	Budget distributed to budget center	VPASS	5 days	5	5	5	5	5	Real time
	Distribute budget program timely to all budget centers.	Time	Budget distributed to budget center	VPASS	5 days	5	5	5	5	5	Real time
	Collect 10% internal revenue; and 20% project.	cash	Amount collected	VPASS	200,000,000	230,000,000	600,000,000	700,000,000	800,000,000	900,000,000	1 billion
	Maintain IFMIS System	Percentage	Reliability	VPASS	90	100	100	100	100	100	Real time
	Procure using pro forma and direct purchases as determined by Management.	Number	Procurement transactions accomplished	VPASS	15	15	10	10	5	5	Real time
	Execute national and international open bid	Number	Total contract that were awarded	VPASS	20	18	18	20	20	20	On demand
	Control and administer contracts	percentage	Effective contract utilization	VPASS	100	100	100	100	100	100	On demand
	Outsource management of non-core student services (dormitory, catering)	Number	Services outsourced	VPASS	-	-	-	-	-	-	2
	Maintain IFMIS System	Percentage	Reliability	VPASS	100	100	100	100	100	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Provide efficient and effective transport service	Deploy parking lots	Number	Efficient control system	VPASS	14	4	4	4	2	2	10
	Implement a vehicle tracking system	Percentage	Reliable system	VPASS	0	100	100	100	100	100	100
	Work to get annual insurance coverage and Bolo for cars	Number	Number of cars insured	VPASS	100	100	100	100	100	100	100
	Work calibration	Number	Cars calibrated	VPASS	65	100	200	300	400	500	1000
	Process to buy cars and car washing machines	Percentage	Available transport system	VPASS	70	80	90	95	100	100	100
Provide efficient and effective facility service	Repair classrooms internal facilities	Percentage	Comfortable for teaching and learning	VPASS	80	90	100	100	100	100	100
	Provide generator maintenances	Percentage	Reliable generator service	VPASS	80	90	95	98	99	100	100
	Repair elevators	Percentage	Reliable elevators	VPASS	50	70	80	90	100	100	100
	Allocate vacated houses	number	Houses allocated to staff	VPASS	402	600	700	800	900	1000	3000
	Maintenance buildings	Percentage	Fully function building	VPASS	60	70	80	90	95	100	100
	Offer garden landscaping services	Percentage	Areas beautified	VPASS	80	80	90	95	98	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Providing efficient property administration	Dispose unusable cars	Percentage	Cars disposed	VPASS	50	70	80	90	95	100	100
	Register assets	Percentage	Asset registered	VPASS	50	70	80	90	95	100	100
Providing efficient student service	Provide catering services	Number	Students served	VPASS	11,000	9,000	8,000	7,000	6,000	5,000	-
	Provide dormitory service	Number	Students served	VPASS	18,000	15,000	15,000	20,000	20,000	20,000	-
	Provide health service	Number	Students served	VPASS	23,000	23,000	23,000	23,000	23,000	23,000	30,000
Strategic Goal 7. Expand national and global partnerships, networking and collaboration.											
Create collaborative platforms and run joint programs with national and international universities/institutions	Stage/organize regional and international symposia, workshops and conferences.	Number	Symposia workshops and conferences organized	President/VPRTT	2	2	2	2	2	2	10
	Increase the number of joint publications and projects (research articles and research projects)	percent of publication	Joint research articles published and project works done	President	50	60	62	63	64	65	70
	Open new national and international collaborative academic programs of studies	Number	Newly opened joint programs of studies	President	10	12	13	14	15	16	20
	Open new branches, outreach centers and campuses overseas.	Number	Newly opened outreach centers and campuses overseas	President	1	1		1		1	2

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Increase the number of international student enrollments	Percentage	Increase in enrollment rate	President	<0.001	0.1	0.2	0.3	0.4	0.5	1
Increase and diversify international student and staff exchange programs	Increase the number of student exchanges	Number	Visiting international students increased	President	10	15	15	15	15	15	100
	Increase the number of international visiting professors	Number	Visiting scholars and professors	President	5	15	15	15	15	15	100
Strategic Goal 8. Contribute towards the realization of UN SDGs and AU Agenda 2063 in higher educations											
Help towards the realization of UN SDGs key target as regards higher educations	Align AAU research to SDG	Percentage	AAU research aligned to SDG	President (VPRTT)	40	50	60	70	80	90	100
	Review education programs to meet global standards and Quality assurance	Number	Review report	President	0	1	1	1	1	1	5
	Integrate sustainable development and global citizenship goals in the undergraduate curricula	Percentage	Programs with issues of sustainable development and global citizenship	President	0	10	10	10	10	10	50
Improve gender equality and inclusion; and create all-inclusive learning environment	Increase the participation of women in leadership	Percentage	Women in leadership positions	President	15	16	17	18	19	20	40
	Increase the participation of women in all program of studies	Percentage	Women participation at all programs of studies	President	30	33	34	35	36	40	50

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Revitalize the causes of pan-Africanism and promote key continental agendas through its involvement in the African Research University Alliance (ARUA)	Increase male – female academic staff mix.	Ratio	60 – 40 % gender mix	President	80-20	78-22	75-25	70-30	65-35	60-40	50-50
	Overhaul university facilities for disability and gender sensitivity	Percentage	Diversity and gender sensitivity facilities	AVP	1	5	10	30	50	70	100
	Strengthen AAU involvement in ARUA, GALA, AAU, Africa UNinet	Number	Joint research grant with ARUA	President	2	2	1	2	1	2	5
Strategic Goal 9. Provide opportunities and resources to attract, recruit, develop and retain the highest caliber academic and administrative staff	Maintain the membership of AAU in ARUA and other similar memberships	Membership Fee	Contribution for the membership	President/VPRTT	20,000	20,000	20,000	20,000	20,000	20,000	100,000
	Develop career plan	Number	Career plans developed	AVP/VPASS	0	1	-	-	-	-	1
	Identify funding sources	Number	Fund secured	AVP/VPASS	20	25	25	25	25	25	50
	Allocate fund from internal revenue for staff development	Percentage	Fund allocated	AVP/VPASS	0	5	10	10	10	10	30
Improve overall staff qualification index	Hire only PhD holders	Percentage	PhD holders employed	AVP/VPASS	31	5	5	5	5	5	80

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
Provide opportunities and resources to attract, recruit, develop and retain the highest caliber academic and administrative staff	Collect and follow up staff development plan of colleges/institutes	Percentage	Performance of colleges as per their staff development plan	AVP	50	2013	2014	2015	2016	2017	
	Encourage and follow-up staff enrolment in graduate by respective academic units	Number	Staff members enrolled in local PhD programs	AVP	NA	25	50	75	100	100	200
	Distribute and support units on PhD degree scholarship opportunities provided by collaborating countries and embassies	Number	Staff members on scholarship	AVP	NA	100	100	100	100	100	200
	Work with Ministries to acquire more scholarship for PhD and Post-Doc programs	Number	Staff members enrolled in PhD programs	AVP	NA	100	100	100	100	100	200
		Number	Staff members enrolled in Post-Doc programs	AVP	2	5	10	15	20	25	200
	Assist the employment and contract renewal of expatriate staff	Percentage	Expat staffs recruited	AVP	NA	100	100	100	100	100	100
		Percentage	Expat contract renewed	AVP	100	100	100	100	100	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Advance good governance, effective leadership and democratization	Improve staff complaint and grievance handling system	Percentage	Complaints /grievances handled	AVP	75	100	100	100	100	100	100
	Timely managing staff teaching and research load	Percentage	Staff members with excess and under load per semester	AVP	85	95	100	100	100	100	100
	Maintain up-to-date academic staff profile	Percentage	Staff Profile documentation (printed or online)	AVP	100	100	100	100	100	100	100
Open and expand further education and scholarship opportunities for the staff	Develop staff development plan	Number	Staff development plans prepared	AVP	0	1	-	-	-	-	1
	Establish joint PhD programs	Number	Joint programs opened	AVP	3	1	1	1	1	1	10
	Increase education opportunities for admin staff	Number	Staff trained and educated (both PG & UG)	AVP	61	12	12	12	12	13	50
Create conducive working conditions and office environment for employees	Standardize office furniture's	Number	Furnished offices	VPASS	N/A	500	500	500	500	500	1000
	Avail sufficient toilets	Number	Clean and adequate restrooms	VPASS	N/A	50	50	50	50	50	100
Strengthen higher education leadership development center and research	Equip the center with human and other resources	Number	Resources adequate for the purpose	AVP	1	1		-	-	-	1
	Conduct training needs assessment	Number	Packages set	AVP	0	1	1	1	1	1	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Design packages	Number	Training manuals developed	AVP	0	10	10	10	10	10	10
	Select trainers	Number	Qualified trainers available	AVP	0	20	20	20	20	20	50
	Conduct training	Number	Sessions conducted	AVP	0	40	40	40	40	40	120
	Evaluate training	Number	Effect of training assessment	AVP	0	1	1	1	1	1	1
	Revise training fee and payment rates for extension and distance education programs	Number	Revised fee and payment guideline	AVP	1	1	-	-	-	-	1
Revise the current recognition and reward system	Develop merit based rewarding scheme and innovation in teaching and research	Number	Reward scheme	AVP	NA	1	-	-	-	-	1
	Introduce service year award	Number	Staff rewarded	AVP	NA	23	23	23	23	23	120
	Establish loan facilities with banks	Number	Award Provided (1 male and 1 female)	AVP	NA	2	2	2	2	2	50
Develop and expand housing scheme for employees	Strengthen Credit cooperatives	Number	Loans secured	VPASS	N/A	1	2	3	4	5	10
	Strengthen housing project with fulltime staff	Number	Fund allocated	VPASS	N/A	1	2	3	4	5	5
		Number	Project office organized	VPASS	N/A	1	2	3	4	5	10

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Provide housing units to staff members	Number	Houses provided	VPASS		100	100	100	100	100	1000
Diversify staff incentive schemes	Engage staff in income generating activities	Number	Rewards given	VPASS		100	100	100	100	100	1000
	Strengthen consumer cooperatives of AAU	Number	Cooperatives strengthened	VPASS	1	-	-	-	-	-	-
Reinstate AAU teacher licensing and relicensing programs	Conduct periodic audit of staff profile	Number	Audit report prepared	AVP	0	1	1	1	1	1	5
	Audit Promotion Process at college and Institute Level	Number	Audits completed	AVP-ASA	NA	50	75	100	100	100	100
	Include teacher licensing certificate as promotion criteria	Number	Revised promotion criteria	AVP	NA	-	-	-	-	-	1
Improve the efficiency and effectiveness of HR	Attract, hire and retain more knowledgeable staff	Number	New employees	VPASS/HR	8762	430	100	100	100	100	500
	Expand employee incentives	Number	Types of incentives provided	VPASS/HR	3	4	5	5	5	5	10
	Identify and provide training	Percentage	Trainings provided	VPASS/HR	20	35	40	50	60	80	100
	Work to provide house for staff	Percentage	Improved number of staff owned house	VPASS/HR	1	10	20	30	40	50	100
	Launch electronics attendance	System installation	e-attendance system procured and installed	VPASS/HR	0	100	100	100	100	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Review service delivery standard and implement	Time	People served in time	VPASS/HR	1 day	Real time	Real time	Real time	Real time	Real time	Real time
	Maintain ICSMS system	Percentage	Reliability	VPASS/HR	80	90	100	100	100	100	100
Strategic Goal 10. Invest in technology, physical infrastructure and institutional facilities.											
Improve digital technology access to staff and students	Provide reliable and broadband connectivity to staff and Students	Number	Computer and lecture rooms, offices, campuses, dormitories, and WiFi Hotspots connected	VPID	4	9	11	14	18	21	30
	Increase staff access to technology (laptops, tablets, printers, projectors, ...)	Percent	Gadgets distributed	AVP and VPID	60	70	80	90	100	100	100
	Provide high and reliable end desktop computing facilities to students	Number	Student Computing Centers	VPID and AVP	2	-	6	14	18	28	28-35
	Conduct ICT literacy and technology adoption classes for staff and students	Number	Trainings conducted	VPID, AVP, VPRTT, VPASS	0	10	30	50	70	80	100
	Access to reliable institutional email services to staff and students with varying privilege	Percentage	Students and staff with email account	VPID	40	60	70	80	90	100	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Expand ICT-supported teaching and student management systems	Expand/implement open source student management system (SMS) (to manage day-one-class-one, instructors' assignment and class attendance, course progress and student's evaluation status, ...)	Number	Reliable information availability	AVP and VPID	50	60	70	80	90	100	100
	Expand the use of open source learning management system (like Moodle)	Number	Courses using the system	AVP	36	36	42	54	66	69	80
	Prepare policies for virtual/e-learning platforms	Number	Policies for virtual/online/e-learning, evaluation, grading	AVP	0	1	-	-	-	-	5
	Access to digital teaching materials, conference proceedings and journals	Number	Library resources digitized	Library	10	15	15	15	15	15	50
	Provide compute and storage facilities to staff and students	Number	Data Center facilities equipped with core IT Infra-structures	VPID VPRTT	2	11	12	14	16	17	17-20
Expand the support of ICT to research	Provide advanced data processing facilities, high end innovation center and discipline specific software	Number	Advanced data processing and supercomputing facilities and discipline specific software	VPID and VPRTT	0	-	1	2	3	4	4-6

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Develop and implement coherent and holistic ICT Governance Systems and Control policies	Develop policies for ICT facilities and services (e.g., internet access, email services, student and learning management systems) access and authentication	Number	Policies developed	VPID	0	60	80	100	100	100	100
	Implement policy for website service and administration	Number	Academic units implementing the policy	VPID	0	-	1	-	-	-	1
	Implement digital graduate (mainly PhD) students support, progress monitoring and status notification system for improved completion	Number	Increase in PhD graduation/completion	AVP VPID	0	-	1	-	-	-	1
	Expand and improve smart classrooms	Number	Smart classrooms	VPID and AVP	80	80	100	120	120	150	150 -200
Expand and improve smart classrooms	Implement Multi Media Studios for Digital Content Production	Number	Studios	VPID	0	-	4	8	12	16	16-20
	Equip classrooms with necessary ICT facilities.	Percentage	Equipped classrooms	VPID	40	50	60	70	80	90	100

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Implement social networking system	Establish electronic information dissemination system in each campus	Number	Electronic boards implemented	VPID, AVP	3	9	15	25	30	40	50
	Create social networking groups (e.g., Facebook and Telegram)	Number	Groups created and total members	VPID	1	2	2	2	2	2	5
	Set tracer study system	Percentage	Graduates engaged in the record	AVP	1	1	1	1	1	1	5
Expand Library Technologies to support the teaching and research activities of the university	Upgrade and integrate the library automation system with other university systems	Version	The version of the software to be upgraded	AVP	KOHA 3.22	KOHA 19.00	Recent Version	Recent Version	Recent Version	Recent Version	Recent Version
	Implement library security system	Version	Branch libraries	AVP	0	6	2	2	2	2	14
	Upgrade Digital Library System	Version	The version of the software to be upgraded	AVP	GreenStone 3.8	Dspace 7.0	Recent Version	Recent Version	Recent Version	Recent Version	Recent Version
	Upgrade the thesis and dissertation repository	Version	The version of the software to be upgraded	AVP	Dspace 6.3	Dspace 7.0	Recent Version	Recent Version	Recent Version	Recent Version	Recent Version
	Upgrade Open Journal Platform	Version	The version of the software to be upgraded	AVP	OJS 2.43	OJS 3.0	Recent Version	Recent Version	Recent Version	Recent Version	Recent Version
	Develop Federated Discovery Platform	Number	System	AVP	0	1	0	0	0	0	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Establish additional centers of excellence in nationally strategic areas.	Establish Artificial Intelligence centers of excellence	Number	Centers established	VPRTT	0	0	-	-	-	-	1
	Provide residential facilities for PhD students.	Number	Residential units	VPASS	N/A	200	200	200	200	200	500
Expand support for graduate students	Provide working office with facilities for PhD students.	Number	Offices provided	VPASS	N/A	200	200	200	200	200	500
	Open source ICT solutions to automate processing in AAU (such as plan, performance reports)	Number	Solutions implemented	VPID and VPASS	N/A	1	1	1	1	1	5
Expand ICT usage in admin domains	Consolidate the use of ICT and data generation in the administration (procurement, human resources and facility management)	Number	ICT tools used/implemented	VPID and VPASS	N/A	1	1	1	1	1	5
	Introduce digital integrated quality management and monitoring systems to all university functions.	Number	Availability and reliability of the system	VPID and VPASS	N/A	1	1	1	1	1	5

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Install electronic security systems	Install security cameras with face recognition in all campuses.	Number	Security cameras installed in all campuses	VPID	N/A	5	5	5	5	5	5
	Renovate classrooms and lecture halls	Number	Classrooms renovated	AVP	N/A	100	100	100	100	100	100
Create conducive classrooms, lecture halls, toilets	Renovate toilets and check their proper handling	Number	Toilets renovated	AVP	N/A	50	50	50	50	50	100
	Install backup power supply system in critical infrastructures (like data centers, computer labs, libraries and clinics)	Number	Backup power supplies installed	VPID and VPASS	2	11	12	14	16	17	17-20
Backup power supply and surge protectors	Install surge protectors in critical infrastructures	Number	Surge protectors installed	VPID and VPASS	N/A	1	1	1	1	1	5
	Encourage using renewable energy sources	Percentage	Energy generated from renewable sources	VPID and VPASS	2	11	12	14	16	17	17-20
Improve water supply	Implement energy saving mechanisms	Percentage	Energy expenditure reduced	VPID	2	2	4	6	8	10	10 - 15
	Ensure uninterrupted supply of water to all facilities	Number	Availability of water supply and alternative sources	VPID	2	2	4	6	8	10	10 - 15

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Create conducive working environment, green and clean campuses	Beautify campus landscape and scenic beauty	Number	Campuses beautified	VPID	1	2	4	6	8	10	10-18
	Prepare master plan for each campus	Number	Master plans available	VPID	4	6	10	14	16	18	25
	Study heritages and documentation	Number of campuses	Documents prepared	VPID	3	5	8	12	-	-	25
Improvement in infrastructure to enhance teaching and learning	Complete going constructions	Percent	Constructions completed	VPID	40	70	100	100	100	100	100
	Start up and process new design projects in different campuses	Number	Projects designed	VPID	3	9	12	15	18	20	20 -
	Complete design and readied for new construction.	Number	Construction is on progress	VPID	N/A	5	9	12	15	17	20 -
	Complete ongoing maintenance works up to provisional acceptance	Number	Maintenance completed	VPID	N/A	6	19	28	36	44	50-70
	Start new maintenance work	Number of projects	Maintenance work in progress resulting in better facilities	VPID	N/A	17	25	33	41	50	50 - 80

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Encourage and focus on sustainable university core income generating activities	Follow up and report revenue collection from teaching learning activities	Percentage of recurrent budget income	Increased revenue	VPID	5	10	15	20	25	30	50
	Ensure the establishment of new business enterprise	Number	Increased revenue	VPID	0	1		2			5-10
	Follow up and monitor the performance of non-academic income sources	Number	Increased revenue	VPID	0	1	1	1	1	1	5
Establish AAU endowment fund, and securing financial resources	Approve endowment policy by the AAU board	Number	The policy is approved by the AAU Board	VPID	0	1	-	-	-	-	1
	Strengthen the project office	Number	Employee hired	VPID	0	-	10	-	-	-	2
	Establish endowment board of trustee	Number	Board of trustee is established	VPID	0	-	-	1	-	-	1
	Conduct study and organize workshop	Number	Study and work-shop organized	VPID	0	1	1	1	1	1	5
	Coordinate ICT and External relation and produce informative documents	Number	Leaflets and web pages are produced	VPID	0	1	1	1	1	1	1
	Work for long term financial security	Number	Proposals are drafted, Fund is secured	VPID	0	1	1	1	1	1	1

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Strategic Goal 11: Put in place and implement procedures and standards to assure the quality of education, research and community engagement											
Ensure the quality of programs of studies at all levels	Develop/revise quality audit framework/policy/guidelines for AAU	Number	Framework developed	President		1	--	-	-	-	1
	Conduct pre-program opening quality audit/external to colleges as per developed framework	Number	Programs audited	President	0	3	6	9	11	14	30
	Conduct process audit /on-going programs	Number	Programs audited	President	0	3	6	9	11	14	28
	Undertake outcome audit /graduates profile audit	Number	Programs audited	President	0	1	2	3	4	5	12
	Introduce relevant international higher education quality assurance tools (both statistical and qualitative) to specific types of programs and university functions to ensure international standards of quality.	Number	Tools implemented in varieties of programs and functions; tools such as ESG, Quality Code, ISO 9004, EFQM Excellence, ELIR, CAF Education.	President	0	-	1	2	3	4	9

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Maintain the quality of research and projects	Develop AAU research, Quality audit framework	Number	Quality audit developed	President	0	1	-	-	-	-	1
	Conduct thematic research quality audit	Number	Thematic researches audited	President	0	1	2	3	4	5	20
	Undertake adaptive research quality audit	Number	Adapted researches audited	President	0	1	2	3	4	5	20
	Carry out seed grants audit	Number	Seed grants	President	0	1	2	3	4	5	20
	Undertake external grant audit/evaluation	Number	External grants audited/evaluated	President	0	1	2	3	4	5	18
Maintain the quality of community engagement and technology transfer	Design quality audit framework for technology transfer and community engagement activities	Number	Framework developed	President	0	1	-	-	-	-	1
	Conduct quality audit and control to selected incubation centers	Number	Audited incubation centers	President	0	1	1	1	1	1	1
	Conduct quality audit to selected scholarly community engagement activities:	Number	Community engagement activities audited and evaluated	President	0	1	2	3	4	5	20
Maintain stakeholder's satisfaction on the educational and services quality of AAU	Undertake annual student on-line satisfaction survey	Number	Surveys undertaken	President	1	1	1	1	1	1	5
	Undertake employer satisfaction surveys	Number	Surveys undertaken	President	1	1	1	1	1	1	5

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
	Undertake staff satisfaction survey	Number	Surveys undertaken	President	1	1	1	1	1	1	5
	Undertake professional quality audit on AAU academic staff (Academic credential and promotion audit)	Number	Credential audited	President	0	3	6	9	11	14	150
	Review the teaching /staff load assignment procedures and processes of selected colleges and departments as per AAU's legislation	Number	Academic units reviewed	President	0	3	6	9	11	14	75
Meet external quality standards and ensure relevance of programs and avoid duplication	Undertake independent quality audit; evaluate randomly selected MA/MSc and PhD programs by an external quality insurer/consultant/group	Number	Programs externally audited	President	0	-	-	5	5	5	10
	Apply for international accreditation for randomly selected graduate programs	Percentage	Programs accredited		0	-	1	2	3	4	5

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Undertake office capacity development for the newly established QA office	Employ new experts in quality management, assurance, audit, program accreditation, program evaluation, and educational information management	Number	Experts employed	President	1	3	-	-	-	-	6
Strategic Goal 12. Transform engineering and technology programs.											
Strengthen engineering & technology educational programs to support MEGA and quality infrastructures (dams, road construction, industrial parks, chemical industries, health-care system, ICT, River Development, water supply systems, liquid and solid waste treatment plants, Aviation and others) demanded nationally and in East Africa.	Develop and Strengthen regular and tailored curricula by identifying skill gaps for implementing specialized development areas and regional urban and regional development issues that are nationally relevant and having a high impact.	Number	Programs launched	AVP and ED/SD	4	7	9	11	13	15	20
	Revise and/or develop limited curricula to address the specialized needs and particularly attract International students.	Percentage/Number	Programs revised/developed	ED/SD and AVP	40/6	30/12	30/10	-/12	-/8	-/8	100/20

Objectives	Activities	Unit of Measure	Performance indicator	Owner	Base-line	Target					2018-2022
						2013	2014	2015	2016	2017	
Enhance the quality of Engineering, Architectural and city development PhD education programs by strengthening collaboration with partner Universities, such as Home-grown PhD programs.	Sustain and further strengthen the existing developments of Railway engineering excellence center and further establish Centre of excellence in AI and Cyber Security, with further aim of attracting International Students.	Number	Home-Grown/ Sandwich programs/	ED/SD	5	4	4	4	4	5	16-20
						2	2	2	2	2	6-10
						100/10	100/30	100/60	100/80	100/100	100/100
Consolidate internship and entrepreneurship into the undergraduate and graduate curricula.	Institution of Internship programs UG/PG	Percentage	Number of center Excellences	ED/ SD and VPRTT	100/10	100/10	100/30	100/60	100/80	100/100	100/100

Establish a governance and financial system taking the special autonomy of the Institute of Technologies (AAiT and EiABC) as per the Autonomous Directives and boost the contribution of AAU to the engineering, technological, and urban development key inputs of national development	Establish a governance and financial system taking the special autonomy of Institute of Technologies in the country	Number	Directive	President and ED/SD	-	1	-	-	-	-	-
	Support IOTs cost center a cost center directly linked with Ministry of Finance for better resource mobilization.	Percentage	Cost center status	President and ED/SD	0	1	-	-	-	-	-
	Implement an accountability system that matches the autonomy	Version	The version of the software to be upgraded	President	-	1	-	-	-	-	-

7. Strategic Initiatives

Initiatives are actions, processes, projects and plans that will help an institution in meeting its strategic goals. After considering a multitude of initiatives in the context of the ten years' strategic plan, the following core initiatives have been identified in line with its strategic goals.

1	Admission to ALL AAU programs (UG and PG) based on Entrance Exam only
2	Ensure the quality of academic, research, community engagement programs of studies at all levels by establishing strong internal quality assurance office
3	Respond to MoSHE Home grown collaborative PhD. Programs by hosting twenty prioritized programs to graduate 2500 in five years
4	Transform AAU press to publishing University research works
5	Identify and develop center of excellences in Unique areas
6	Establishing Ethical Review Board and implement article publishing as mandatory for graduate program students
7	One Health program focused on integrating Human-animal disease studies
8	Collaborative PhD. and MA Programs with international Universities and Upgrade 40 PhD. programs to African level in collaboration with ARUA
9	Establishing and strengthened Higher education research and leadership training Center
10	Medical City initiative by College of Health Sciences
11	Univer-City initiative to create educational and Cultural Hub
12	Diversify and increase internal revenue by establishing enterprises and other sources
13	Automation of University activities through integrated system
14	Automate and improve the efficiency and effectiveness of the internal processes (academic, Research, Human Resources, finance, procurement, facility management, ...)
15	Construct and maintain buildings for classrooms, offices, conference halls, syndicates, training halls, libraries, museums, , sport complexes, workshops and toilets
16	Dormitory for graduate program students(priority to students outside AA)
17	Establishment of AAU alumni
18	Mapping and establishing Public-private-partnership (PPP)
19	Opening Online graduate programs
20	University-wide program review and institutional audit for quality and relevance
21	Secure Institutional autonomy and conduct institutional Reform
22	Establish Artificial Intelligence center and Data Repository
23	Establish core science lab
24	Academic Programs internationalization and accreditation

8. Monitoring and Evaluation

8.1. Strategic Focus

The strategy at the University level answers the basic question of “How do we structure the overall University so that all of its parts create more value together than they would individually?”. On the other hand, Cost Center strategy is concerned with competing successfully in individual industry and it addresses the question “How do we win in the industry of operations”? This strategy needs to be linked to the strategic goals identified in the university level strategy.

The Colleges, Centers and Schools or academic units should focus on making tactical decision such as improving curriculum design and executing teaching approaches based on the growth strategy of the university level. The Cost Centers must also work in ensuring quality of services through engagement of staff at all levels in continuous improvement of processes using selected tools such as benchmarking, Kaizen, root cause analysis.

Functional strategy is a team level strategy for achieving certain objectives based on critical success factors and key performance indicators. It deals with how individual and team actions contribute to performance in the areas identified as critical success factors. However, there must be key performance indicators for the CSFs to measure how all work units are contributing for overall performance of the university.

Identification of the CSFs is one method of developing KPs. Critical success factors are the few areas (from five to seven) where leadership and management must focus for significantly improving the performance of the university. Critical success factors (CSFs) and key performance indicators (KPIs) are used to determine measures of university level performance. CSFs are identified first, since they are the areas of performance that the university considers vital to its success, like a dashboard to a vehicle’ driver. They are typically broad-brush statements such as ‘customer service’ or ‘low costs’. Two types of CSF have been considered as general approach; namely, Industry Wide Critical Success Factors and Organization specific ones.

8.2. Critical Success Factors (CSFs)

Since different organization manifest some degree of uniqueness in their mission and objectives, there is a need to identify organization specific critical success factors. Organization-specific CSFs are indicators for opportunities, activities or conditions required to achieve the objective within an organization in achieving the successful

fulfillment of the value propositions of the stakeholders.

8.3. AAU Specific Critical Success Factors

The CSF of AAU are proxy indicators which show the efforts of the AAU community in all areas of its operations. It is essential that the courses of actions which the leadership takes are fully coordinated with the strategic goals that help AAU fulfill its mission. Strict adherence to CSFs will have a huge impact on the degree to which AAU is successful and effective in reaching strategic goals within the mission and is crucial in gaining a competitive advantage. Excellence may be achieved by 2030 given the journey towards excellence considers a holistic approach. Table 15 indicates the critical success factors, objectives and key performance indicators of AAU.

As measurement capacity of AAU and its performance management system improve in the years to come through capacity building, more PIs may be identified depending upon ability to generate information from the systems. AAU will be able to reach at knowledge management systems at the end of this strategic planning period with the concomitant capacity building in ICT. The CSFs which have been identified and KPIs developed will guide the performance of AAU due to the persistent efforts of leadership, management and employees at all levels.

Table 15. CSF, Objectives, KPIs, and Performane Indicators

Critical Success Factors	Objectives	Key Performance Indicators	Strategic deployment Period				
			2020/21	2021/22	2022/23	2023/24	2024/25
Leadership and Governance	Provide sustainable and effective strategic leadership to the entire University and its organs for excellent performance by 2025.	Leadership quality improvement (thinking and acting) and solve the backlogs and current problems	1	1	1	1	1
	Create effective leadership and management competences for execution of strategies in the entire University and its units by 2025	Effective strategy execution and performance improvement	15%	15%	15%	15%	15%
	Diversify internal revenue scheme	Increase the revenue sources and collect 30% of its budget 30% by 2030	15%	16%	17%	18%	20%
	Restore academic freedom and institutional autonomy	Become Chartered University	1	1	1	1	1
Human Resource Focus	Achieve a net promoter score of 50% or more from employees by 2025 as measured using Net Promoter Score (NPS). (Note that 75% is world class achievement).	Net Promoter score measured the satisfaction and loyalty of employees on a quarterly bases	0%	10%	25%	35%	50%
Clients/Student Focus	Achieve a net promoter score of 40% or more from students and employers by 2024/25 as measured using NPS	Net Promoter score measured the satisfaction and loyalty of employees and employers on a semester bases	0%	10%	20%	30%	40%

		International Student population (%) reaches 10% by 2030	2(%)	4(%)	6(%)	8(%)	10(%)
Teaching-Learning	Achieve 10% international student population ratio by 2024/25	Number of branches opened outside Ethiopia to neighboring countries	2	2	2	2	2
	Transform AAU to a culture of student orientation by 2024/25	Average staff consultation hours per student per semester	2	3	4	5	6
		Number of processes improved (related to student service)	4	6	8	10	12
	Programs reviewed rigorously	Number of programs reviewed	5	16	24	30	35
	PhD Students Programs increased	Number of admission including home grown PhD (HCCP)	500	550	550	600	600
ICT	Achieve ICT transformation and its use for strategic role in driving innovation and transform learning by 2025.	Office Automation	1	1	1	1	1
		Implementation of ERP for internal processes	1	1	1	1	1
		ICT used for innovation	1	1	1	1	1
		Establishment of Knowledge Management systems	1	1	1	1	1
		Staff training on selected applications	1	1	1	1	1
Infrastructure	Achieve adequate investment in infrastructure building and maintenance for improving quality of teaching-learning process and research by 24/25.	Investment in ICT computing capacity	1	1	1	1	1
		Amount of investment in infrastructure increased	1	1	1	1	1
		Investment in maintenance increased	1	1	1	1	1
		Additional space due to investment created	1	1	1	1	1

Performance Result	Achieve 50% gender ratio in the student and 35% academic and research female staff population by 2025.	% female academic staff increased from 16.3% to 35% by 2030	5	5	5	5	5	5	5
	Achieve 75% PhD academic staff composition by 2024/25.	% female students proportion at (undergraduate, graduate and post graduate levels respectively) increase to 50% by 2030	5	5	5	5	5	5	5
	Achieve publications of two peer-reviewed articles per academic staff per year by 2025.	% academic staff mix reaches 5:20:75 by 2030	5	5	5	5	5	5	5
	Increase internal revenue to 30 % of the recurrent budget through diversification of sources by 2025	Publication of average peer-reviewed articles per academic staff per year	1	1	1	1	1	1	1
		Revenue generated from internal sources reach 30% by 2030	20%	25%	30%	30%	30%	30%	30%
Research		Research increased	20	40	60	80	100	100	100
	Increase the number of research and publication by 100% by 2024/25	Publication increased by 20% each year	20	40	60	80	100	100	100
		Conference/workshop increased by 20% each year	20	40	60	80	100	100	100
Community Engagement	Academic staff engaged in 3 credit hours scholarly community engagement activities per year	Number of accomplished community engagements	100%	100%	100%	100%	100%	100%	100%
University Industry Linkage	University and Industry partnership	Number of joint projects initiated and accomplished by PPP and/or PP increase	20	50	70	100	200	200	200

The greatest source of sustainable competitive advantage for AAU is its investment on the staff at all levels through capacity building or human capital development through cost effective and judicious need-based training. Great effort will be exerted on training and staff development during the first five years of the strategic plan. However, since training is expensive, it will be need based.

8.4 Monitoring and Modifying Strategic Plan

Risk and Disaster Management system will be put in place to identify and avoid the emergence of undesirable issues or to mitigate them at early stage. The basic tenet of the risk and disaster management system is building resilience, reducing vulnerability and disaster preparedness because the external environment is often dynamic, complex and unpredictable.

Managing opportunities also needs preparedness. Threats could disappear and new opportunities could be captured as they opportunities emerge. Weaknesses could also be removed and new strengths could emerge. Such dynamic trends will be monitored and managed by the able capacity of the University top management.

Progress towards achievement goals and accomplishment of the action plan will be monitored regularly. The Strategic goals will be re-evaluated and objectives updated every year based on the progress made, obstacles removed with the dynamic environment in perspective. Positive developments in the economy, changes in national priorities, or changing demand patterns of the target market will also be monitored. For this, the top leadership of AAU will be at vantage point to quickly capture the opportunities for the benefit and advantage of the university and make critical decisions and take pertinent actions.

Targets and thresholds align the measurements of AAU and the different units with the corporate objectives and initiatives and help gain leadership support to integrating quality into daily processes. Although the strategy by necessity has top-down approach, the units are encouraged to choose their own specific targets and other details about how each will ensure quality and achievement of the overall Corporate objectives.

Target and thresholds need strong governance to make a lasting contribution to AAU. Roles, responsibilities, and resources are, therefore, defined so that the University can continue to make effective decisions about what should be measured, how data should be collected and analyzed, and what actions to take based on measurement results. Hence, measurements are focused on value-added activities and strategic objectives so that the returns on the initiatives are significant.

Thresholds for all performance targets			
Red (Below Satisfactory)	Yellow (Satisfactory)	Green	Dark Green (Excellent)
<79%	(80 – 89) %	(90 – 99) %	>=100

8.5 Performance Evaluation

Top management approves a series of programs and supporting operating budgets for the Cost Centers during implementation of the strategic plan. Actual expenses are contrasted with planned expenditures, and the variance is assessed. This is typically done on a quarterly basis at the Cost Centers and semi-annually at the AAU level. Other issues that are subject to evaluation may include periodic statistical reports summarizing data on such key factors as problems solved, labor turnover, and student performance, research performance, community engagement, stakeholder engagement, revenues generated, grants received, investment in new projects, articles published in reputable journals.

The head office and the Cost Centers (Deans and Directors) are designated as responsibility centers for performance evaluation.

The center will use resources (measured in terms of costs or expenses) to provide a service. Each of the shared function in the head office is classified as expense center. The Internal Audit Department and the Project Management Office assume the responsibility of facilitating management audit. In the first five years of this strategic plan AAU will have built the capacity to perform regular strategic audit every two years.

Vision: Become a world class university and the leading Research University in East Africa.

Mission: As a research university, is to produce competent graduates, pursue problem-solving and knowledge-expanding research outputs, and actively participate in scholarly community engagements in order to contribute to national, continental, and global development.

Core Value: AAU adheres to the following core values and principles:

1. **Excellence:** The University commits itself to the attainment of the highest standards in academic performance by delivering high-quality programs, promoting excellence in research and scholarly community engagement, and engaging the community in all university functions.
2. **Innovation:** AAU promotes the development of innovative ideas that are marketable and that address societal needs.
3. **Academic freedom:** AAU upholds high academic freedom as its core value; where all members of the university community exercise full right for free expression of thought, scholarly dialogue, and fact-based ideas.
4. **Responsibility and accountability:** AAU ensures academic and non-academic responsibility and accountability through responsible decision making and prudent management of resources entrusted to it.
5. **Integrity and honesty:** AAU fosters honesty, integrity, fairness and ethical and professional codes of conduct in its teaching-learning, research, and managing of its resources.
6. **Unity and inclusiveness:** AAU embraces inclusiveness and promotes multicultural awareness, tolerance, unity, participation and equal opportunity of employment, education and decision making.
7. **Customer focused:** AAU strives to provide high quality services and benefits to its customers effectively and efficiently.

"Prove all things; hold fast that which is good"
